

An Introduction to the Learning application

The Learning application is where e-learning content is kept and can be accessed by users.

It has links to other standalone applications that can be used with it, as detailed below.

If you want to administrate Learning, it's a good idea to make your account an [application administrator](#) for all those included, e.g. Courses, Quiz & Events.

The index below offers more information on how to use the application. If you run into any issues or have a product functionality question, please [submit a support ticket](#) so our team can assist.

Learning application literature index

These guides are intended for [sysadmins & application administrators](#) - those who will advise end-users on how to use the application as well as manage the content over time.

It is recommended to start at the top and read through in order.

Application fundamentals and configuration

Further Learning

We have an e-Learning course available [here](#) on Discover that covers the Learning application in detail and would suit new administrators or those looking for a refresher.
