

Holiday Planner notifications

We will provide an overview of all Holiday Planner notifications.

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > Holiday Planner**

Holidays

[English](#)
[French](#)
[Spanish](#)
[Polish](#)
[Kurdish](#)

[U.S. International](#)
[German](#)
[Dutch](#)
[Greek](#)
[Hungarian](#)

[Russian](#)
[Portuguese \(Brazil\)](#)
[Czech](#)
[Arabic](#)
[Uzbek](#)

Notification not sending?

Remember: The type of notification received by users, e.g. email, in-system, none, etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are correct to receive this as they would expect first.

Browse our guides on the Holiday Planner application [here](#)

holidays.hpnotifier.changes_my_holidays

This is a legacy template and will be removed in a future product.

holidays.hpnotifier.new

This notification will fire when a new holiday is booked [by the user themselves](#) or a [manager/substitute on their behalf](#).

The recipient is the user.

holidays.request.cancel_canceled

This notification will fire when a [cancellation for a booking \(that required approval\)](#) is denied by a manager/substitute.

The recipient is the user.

holidays.request.canceled

This notification will fire when a cancellation for a booking (that required approval to make) is [accepted by a manager/substitute](#).

The recipient is the user.

holidays.request.declined

A booking request sent for approval by a user has been [denied by the manager/substitute](#).

The recipient is the user.

holidays.request.updated

The user made changes to an established booking.

The recipient is the user.

holidays.hpnotifier.changes_your_holidays

The manager/substitute made changes to an established booking.

The recipient is the user.

holidays.request.approved

This notification will fire when a booking request sent by a user is [approved by the manager/substitute](#).

The recipient is the user.

holidays.request.cancel_requested

This notification will fire when a user sends a [cancellation request](#) for a booking that has already been approved.

The recipient is the manager/substitute.

holidays.request.created

This notification will fire when [a booking is created by a user](#) (and does not require approval, so is automatically accepted)

The recipient is the user.

holidays.request.deleted

This notification will fire when the user deletes a holiday request.

The recipient is the user.
