

Search notifications

We will provide an overview of available Search notifications.

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > Search**

Search		
English	U.S. International	Russian
French	German	Portuguese (Brazil)
Spanish	Dutch	Czech
Polish	Greek	Arabic
Kurdish	Hungarian	Uzbek

Notification not sending?

Remember: The type of notification received by users, e.g. email, in-system, none, etc., will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are set to receive this as they would expect first.

[Browse our guides on the Search application here](#)

Both notifications relate to 'User suggestions' being enabled by an application administrator on the admin side of Search:

The screenshot shows the 'Search Options' configuration page in the Admin interface. The left sidebar lists various search-related settings, with 'Search Options' currently selected. The main content area shows several options, including 'Recent searches', 'Results per page', and 'User search suggestions'. The 'User search suggestions' option is checked, and the checkbox is highlighted with a red rectangular box. Below this option is a 'Save' button.

Search Options
Recent searches ☒ Display recent similar searches by other users
Results per page 20
User search suggestions ☒ Allow Users to submit search suggestions
Save

Then, in the Search recommendations tab > User requests the two checkboxes correspond to the possible notifications:

Search Term	Comment	User	Date		
learning	Couldn't find a link to LMS	Michael Hassman	01-06-2016 15:53		

☒ Notify admin

☒ Notify the User if their search suggestion is used

Save

search.suggestion_request_created

This notification will fire when a new search suggestion is created by a user. All Search [application administrators](#) will be notified, as long as the 'notify admin' option is selected as shown above.

search.suggestion_request_implemented

This notification will fire when a search suggestion made by a user has been implemented as a phrase in a [search recommendation](#). The recipient is the user who created the suggestion.

(The phrase must exactly match the user suggestion for the system to be able to recognise this notification)
