

Adding an Album to Image Gallery

Archived

Introduction

You have the ability to create albums within Image Gallery to store groups of images. When images are added through the front end they are able to be placed within these albums.

Adding an album

To add an album you will need to go to:

Starting from Claromentis 8.3 user with permission (set in admin panel) can create an album from the front-end

Admin > Image Gallery

Within the application you will see any existing albums. To add an album you will need to click on the 'Add album' button in the top right corner.

Once this has been clicked on you will be presented with the following screen:

You will need to work your way through the list, filling in the details:

Title - A title for the album

Description - A brief description of what will be contained within the album

Metadata set - The metadata that will be associated with the album

Info to display... - What information is displayed within the list of images

Permissions - You can then set permissions for the album, ranging from which users can view the album, add/edit/delete images and manage the album tags and image collections.
