

## Knowledge Base Components

N.B. This article refers to the **legacy application Publish**, used in versions below 8.1. In modern versions, the Pages application has effectively replaced the need for Publish. Continue reading if you are using Publish and wish to implement this smart object.

### Introduction

There are two Knowledge Base components that can be embedded into a Publish template; a "Recent Articles" component, and a "Recent Questions" component.

#### Recent Articles

-  **Claromentis Digital Workplace** ✓  
20th July 2015
-  **Asset Register**  
1st June 2015
-  **Centralized or Decentralized Content Management?** ✓  
16th April 2015
-  **Content Management Guidelines**  
16th April 2015
-  **Incremental Intranet Improvements VS The Big Bang Approach** ✓  
16th April 2015

#### Recent Questions

-  **Jennifer Langdon** asked...  
**Can you create E-forms for us?**  
1 comments • 11 views • 18th November 2014
-  **Claire Bond** asked...  
**What are Infocapture plugins?**  
2 comments • 13 views • 3rd November 2014
-  **Jacob Black** asked...  
**What is Innovate?**  
2 comments • 10 views • 3rd November 2014
-  **Vanessa Wright** asked...  
**How does archiving work?**  
1 comments • 8 views • 3rd November 2014

 Please note that the image above is a generic representation of the component, and may not necessarily reflect the final product on your own intranet.

### Configuration

 Before proceeding, please read the overview in the [Smart Objects and Components](#) guide.

Recent Articles Component

Copy and paste the below code into a Publish template:

```
<!-- Recent Articles Component : usage example --> <component name="KnowledgebaseRecentArticles" class="\Claromentis\knowledgebase\component\RecentArticles">
```

Depending on your version of Claromentis, particularly if you're using Claromentis 8, you may need to try this instead:

```
<component class="\Claromentis\Knowledgebase\UI\RecentArticles">
```

The following attributes can be configured to determine what is displayed in the component:

**limit:** [int] the number of articles to return

**category\_ids:** [int or int,int,...] shows articles from the specified category

**endorsed\_only:** [1 or 0] shows only endorsed articles (1=yes, 0=no)

```
<!-- Recent Articles Component : usage example with attributes --> <component name="KnowledgebaseRecentArticles" class="\Claromentis\knowledgebase\component\RecentArticles" limit="8" category_ids="1,2,3" endorsed_only="1">
```

Or

```
<component class="\Claromentis\Knowledgebase\UI\RecentArticles" limit="8" category_ids="1,2,3" endorsed_only="1">
```

### Recent Questions Component

Copy and paste the below code into a Publish template:

```
<!-- Recent Questions Component : usage example --> <component name="KnowledgebaseRecentQuestions" class="\Claromentis\knowledgebase\component\RecentQuestions">
```

Or

```
<component class="\Claromentis\Knowledgebase\UI\RecentQuestions">
```

The following attributes can be configured to determine what is displayed in the component:

**limit:** [int] the number of questions to return

**category\_ids:** [int or int,int,...] shows questions from the specified category

**unanswered\_only:** [int][1 or 0] shows only unanswered questions (1=yes, 0=no)

```
<!-- Recent Questions Component : usage example with attributes --> <component name="KnowledgebaseRecentQuestions" class="\Claromentis\knowledgebase\component\RecentQuestions" limit="8" category_ids="1,2,3" unanswered_only="1">
```

Or

```
<component class="\Claromentis\Knowledgebase\UI\RecentQuestions" limit="8" category_ids="1,2,3" unanswered_only="1">
```
