

Eventbrite Calendar Integration

Archived

Overview

Displaying events you've created in Eventbrite in Claromentis Calendar

Prerequisite: Claromentis 7.4.x

How to Install

GIT: <https://git.claromentis.net:1443/mod/eventbrite>

Clone this repository into **/intranet/eventbrite**

COMPOSER

{todo}

Setting up Eventbrite API

1. Log in to Eventbrite under your company or event organiser account and go to **Settings**
2. Under Developer go to **App Management**
3. Click **Create a New App**

Fill out the details such as First name, Surname and Company Name

Application URL = Enter your Intranet web address for example <https://intranet.mycompany.com>

OAuth Redirect URI = Leave blank

Application Name = Claromentis Calendar

Description = Displaying Eventbrite Events in Claromentis Calendar

4. After submitting you will be given **App Key** and **Personal OAuth Token**

Make a note of these numbers as you will need to provide this to Claromentis Config File

APP NAME	KEYS	ACTIONS
<div><div><div>System Calendar</div></div></div>	<div><div><div>App Key</div><div>SR35XOA2HP3UDJQ3K4</div><div>Show Client Secret and OAuth Token</div></div></div>	<div><div><div>Key Details</div><div>Directory Listing</div><div>App Extension</div></div></div>
<div><div><div>Client secret</div></div></div>	<div><div><div>5BS2AX7WJZTW7KUH2RE7ZEIGK5GDKTIHVAZODLJJNDQUDC5KZ</div></div></div>	
<div><div><div>Your personal OAuth token</div></div></div>	<div><div><div>2HNFOLN7TAUUVDX3T5UY</div><div>Access Token</div></div></div>	
<div><div><div>Anonymous access OAuth token</div></div></div>	<div><div><div>IUY5RJ7TGVIMUO44DMOE</div></div></div>	

5. Navigate to these pages to find the **User Key**

The user key is a unique string assigned by Eventbrite which identifies the user who made the API call.

Navigate to: https://www.eventbrite.co.uk/userkeyapi?internal_ref=login

Eventbrite

Search for events

- Email Preferences
- Unused Venues &

Your API User Key

1434965372145577470132

What is an API User Key?

The user key is a unique string assigned by Eventbrite which identifies the user making an API call. This **replaces** basic username/password authentication. A valid user key is the recommended method for user authentication with the Eventbrite API.

6. Lastly you need to find the **User ID**

Navigate to this page by replacing XXXX with the actual **Access Token**

https://www.eventbriteapi.com/v3/users/me/owned_events/?token=XXXXXXXXXXXXXXXXXXXXX

Eventbrite API

GET /v3/users/me/owned_events/?token=2HNFOLN7TAUUV

REQUEST

PARSED AUTHENTICATION

OAuth token: 2HNFOLN7TAUUVDX3T5UY

User ID: 146158038308

App key: SR35XOA2HP3UDJQ3K4

EXPANDED FIELDS

Adding API parameters in Claromentis Config File

Add the following lines in the Claromentis config file (/intranet/common/config.php)

```
$cfg_cln_system_calendars[] = "\\Claromentis\\Eventbrite\\CalendarProvider";
```

```
$eventbrite_user_id = 'XXXXXXXXXXXXX';
```

```
$eventbrite_app_key = 'XXXXXXXXXXXXXXXXXXXXX';
```

```
$eventbrite_user_key = 'XXXXXXXXXXXXXXXXXXXXX';
```

```
$eventbrite_access_token = 'XXXXXXXXXXXXXXXXXXXXX';
```

Where is it displayed?

Navigate to your file:///Claromentis/application/web///calendar/

A new calendar will be displayed alongside **"System Calendars"**
