

Eventbrite Calendar Integration

Archived

Overview

Displaying events you've created in Eventbrite in Claromentis Calendar

Prerequisite: Claromentis 7.4.x

How to Install

GIT: <https://git.claromentis.net:1443/mod/eventbrite>

Clone this repository into `/intranet/eventbrite`

COMPOSER

{todo}

Setting up Eventbrite API

1. Log in to Eventbrite under your company or event organiser account and go to **Settings**
2. Under Developer go to **App Management**
3. Click **Create a New App**

Eventbrite
Search for events
Browse Events
marketing@...

- Password
- Social Settings
- Credit/Debit Cards
- Email Preferences
- Unused Venues &

Your API User Key

1434965372145577470132

What is an API User Key?

The user key is a unique string assigned by Eventbrite which identifies the user making an API call. This **replaces** basic username/password authentication

A valid user key is the recommended method for user authentication with the Eventbrite API.

6. Lastly you need to find the User ID

Navigate to this page by replacing XXXX with the actual Access Token

https://www.eventbriteapi.com/v3/users/me/owned_events/?token=XXXXXXXXXXXXXXXXXXXXX

[↻](#)
[🔒](#)
https://www.eventbriteapi.com/v3/users/me/owned_events/?token=2HNFOLN7TAUUV

Eventbrite API

GET /v3/users/me/owned_events/?token=2HNFOLN7T

REQUEST

PARSED AUTHENTICATION

Auth token: 2HNFOLN7TAUUVDX3T5UY

User ID: 146158038308

App key: SR35XOA2HP3UDJQ3K4

EXPANDED FIELDS

Adding API parameters in Claromentis Config File

Add the following lines in the Claromentis config file (/intranet/common/config.php)

```
$cfg_cln_system_calendars[] = "\\Claromentis\\Eventbrite\\CalendarProvider";
```

```
$eventbrite_user_id = 'XXXXXXXXXXXXX';
```

```
$eventbrite_app_key = 'XXXXXXXXXXXXXXXXXXXXX';
```

```
$eventbrite_user_key = 'XXXXXXXXXXXXXXXXXXXXX';
```

```
$eventbrite_access_token = 'XXXXXXXXXXXXXXXXXXXXX';
```

Where is it displayed?

Navigate to your file:///Claromentis/application/web///calendar/

A new calendar will be displayed alongside "System Calendars"
