

## Adding Google Fonts into CKEditor

### Overview

Google provides wide range of fonts which can be used on the web or intranet <https://www.google.com/fonts>

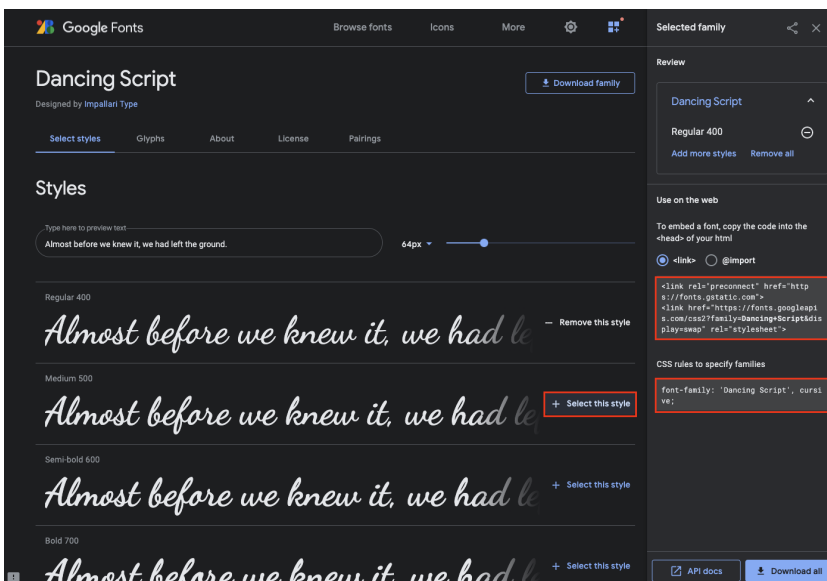

This can be used as part of the Interface or add it to the available fonts in CKEditor for content creation.

**Warning:** If your system is hosted on-premise you might have some restrictions using Google Web Fonts due to firewall rules. Adding too many web fonts can increase load time and decrease system performance.

### How to

1. Get the font collection from Google fonts put them into Collection and follow the implementation guide for **Web usage**

Select the style of font you wish to have (you can select multiple styles) For the purpose of this guide, were selecting **Dancing Script Regular 400**

2. Under **Use on the web**, choose **link** and copy the code shown.

3. In **Claromentis**, navigate to **Admin > Design**

You can either **Edit Master Design** if you wish to use it in all themes or select an applicable theme in which you wish to use this font.

Navigate to **Edit Style > Advanced** tab and paste the code into the **Custom Code** field.

#### Custom Code

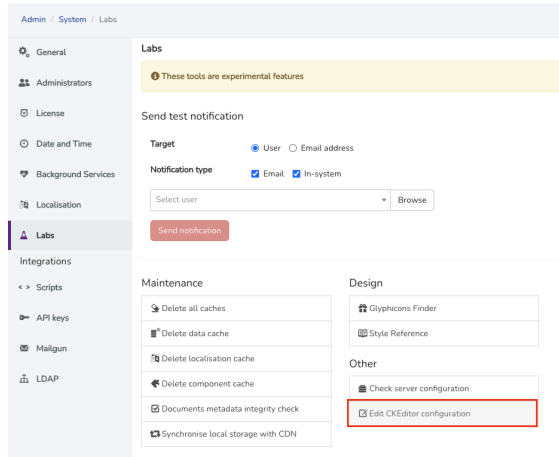

Copy custom code (for example Google Analytics tracking code) and paste in the text area below.

```
<link rel="preconnect" href="https://fonts.gstatic.com">
<link href="https://fonts.googleapis.com/css2?family=Dancing+Script&display=swap" rel="stylesheet">
```

Click **Save**

The font is now ready to use by the system, in the next step, we need to add it to the dropdown font-selector on the CKEditor.

#### 4. Navigate to **Admin > System > Labs > Edit CKEditor configuration**

#### 5. Select **ckconfig.js** if you wish to add this font for all applications when the full-editor is displayed such as News, Knowledge Base or Pages.

##### Edit CKEditor configuration

Select a CKEditor configuration file to edit

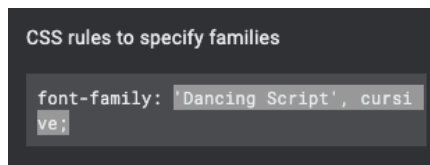

Warning: Modifying CKEditor config may render the editor unusable. Do not make changes here unless you know what you are doing.

ckconfig.js  
ckconfig\_mail.js  
ckconfig\_mail\_sig.js  
ckconfig\_news.js  
ckconfig\_blog.js  
ckconfig\_publish.js  
ckconfig\_compliance.js

ckconfig\_ic\_field.js  
ckconfig\_ic\_section.js  
ckconfig\_ic\_notice.js  
ckconfig\_ic\_project.js  
ckconfig\_ic\_project\_notifications.js  
ckconfig\_pages\_text\_component.js  
ckconfig\_communication.js

If you wish to allow font selection only on a specific application select relevant **ckconfig\_{application}.js**

Paste the following code into the text area (replace the red line with your selection of custom font) by checking the reference for **CSS rules to specify families**.

```
config.font_names =
'Arial/Arial, Helvetica, sans-serif;' +
'Times New Roman/Times New Roman, Times, serif;' +
'<Font Dropdown Name>/<Font Name>, <font-type>'; +
'Verdana';
```

Here is a video on how to:

## Editing "ckconfig.js"

A display name may be optionally defined by prefixing the entries with the name and the slash character.

Admin / System / Labs / Edit CKEditor configuration / Editing "ckconfig.js"

Edit CKEditor configuration

Editing "ckconfig.js"

File contents

```
config.font_names =  
'Arial/Arial, Helvetica, sans-serif;' +  
'Times New Roman/Times New Roman, Times, serif;' +  
'Dancing Script/Dancing Script, cursive;' +  
'Verdana';
```

Save

Remove Customisation

Please note: You won't be able to see the desired font until you have submitted the changes or previewing them.

This is due to the CSS which are only being called when viewing intranet pages (not when editing).

---

## Dancing Script

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nulla eget dictum orci. Suspendisse vitae mi et neque facilisis ullamcorper et sed nunc. Mauris ac lorem at neque ornare venenatis. Aliquam eros leo, placerat at dolor a, posuere varius lorem. Phasellus eget justo laoreet lectus placerat rutrum quis tincidunt arcu. Donec dictum purus finibus, volutpat nibh sed, accumsan neque. Proin nec enim urna.
