

Claromentis Browser Support Endorsed

Our teams focus on utilising the latest technology, allowing our customers to benefit from the best intranet software for their business. As browser technology advances, so do we, and our research and development go into creating software which makes use of the newest features modern browsers can offer.

Each new version of Claromentis is thoroughly tested to ensure compatibility with modern browsers, providing a seamless and reliable user experience.

We will typically only support the most current browsers, so that we can continue to produce cutting-edge software for our customers

Claromentis 9, 10 & 11

We no longer support Internet Explorer. We've made this decision in order to improve the security and reliability of our product and help us to design and develop the best possible intranet software for our customers.

Browser	Version
Mozilla Firefox	Latest Recommended
Apple Safari	Latest Recommended
Google Chrome	Latest Recommended
Microsoft Edge	Latest Recommended

Unsupported versions

v7

Internet Explorer 8 **Partial**

Internet Explorer 11 **Recommended**

Google Chrome Latest **Recommended**

Mozilla Firefox Latest **Recommended**

Apple Safari Latest **Recommended**

Mobile browsers: iOS 7+, Android 4+,

v8

Internet Explorer 9 **Partial**

Microsoft Edge Browser **Recommended**

Google Chrome Latest **Recommended**

Mozilla Firefox Latest **Recommended**

Apple Safari Latest **Recommended**

Mobile browsers: iOS 8+ , Android 4+

v8.1 & 8.2

Claromentis 8.1 will no longer support Internet Explorer 9. This is to make way for our new module, Pages, which allows intranet administrators to customise their homepage with drag and drop functionality.

Microsoft Edge Browser **Recommended**

Google Chrome Latest **Recommended**

Mozilla Firefox Latest **Recommended**

Apple Safari Latest **Recommended**

Mobile browsers: iOS 8+ , Android 4+

v8.3 - 8.11

Claromentis will no longer support Internet Explorer 10. This version of the browser has not received support from Microsoft since January 2016. Encouraging the usage of this browser means putting users at risk of security vulnerability.

Internet Explorer 11

Microsoft Edge Browser **Recommended**

Google Chrome Latest **Recommended**

Mozilla Firefox Latest **Recommended**

Apple Safari Latest **Recommended**

Mobile browsers: iOS 9+ , Android 5+
