

Converting Publish Templates from Claromentis 7 to 8

Overview

Claromentis 7 uses front-end framework called Bootstrap 2 while Claromentis 8 has incorporate newer version of this framework: Bootstrap 3.

There are some major changes between both versions. Bootstrap 2 is no longer supported by the developer.

This article described on how to convert your publish template which you may have created in Claromentis 7 to be compatible with Claromentis 8

Prerequisite

You need to be comfortable making changes in HTML codes
Access to Publish Admin panel and edit the template content

Step 1: - Updating Grid Layout

Replace

`<div class="spanX">` to `<div class="col-sm-X">`

X= number

For example

`<div class="span8">` to `<div class="col-sm-8">`

`<div class="span4">` to `<div class="col-sm-4">`

Step 2 – Replacing Infobox with Panel

`<div class="infobox">`

to

`<div class="panel panel-default">`

Step 3 - Replacing h3 within infobox with panel-heading

`<div class="infobox">`

`<h3>Enter title here</h3>`

...

to

`<div class="panel panel-default">`

`<div class="panel-heading">Enter title here</div>`

...

Step 4 - Replacing content area with panel-body

Replace class="body" within infobox with class="panel-body". For example you may have :

```
<div class="infobox">
<h3><span name="e_main_title" pub_type="string">Enter title here</span></h3>
<div class="body" name="e_box_a_content" pub_type="text" >Enter content here.. </div>
</div>
```

change those to:

```
<div class="panel panel-default">
<div class="panel-heading"><span name="e_main_title" pub_type="string">Enter title here</span></div>
<div class="panel-body" name="e_box_a_content" pub_type="text">Enter content here.. </div>
</div>
```

Step 5 - Updating Edit Me Button at the bottom

At the bottom you'll find edit me button which needs to be updated:

```
<div name="e_cla_editme" class="well">
<a href="#" name="e_cla_editme_link" class="btn"><span class="cla-icon-pencil"></span>Edit</a>
</div>
```

to

```
<div name="e_cla_editme" class="well well-sm">
<a href="#" name="e_cla_editme_link" class="btn btn-default"><span class="glyphicons glyphicons-pencil"></span>Edit</a>
</div>
```
