

## Roles and Permission in Projects

Archived

In Projects we have the following roles:

**PM** : Project Manager

**Senior Team**: Senior team can edit project team and has access to sensitive project information such as financial information (used in plug-ins)

**Team** : Standard team member of a project

**Senior Client**: Client won't be able to see private tasks, but senior client can access sensitive project information such as financial information

**Client**: Standard client permission that won't be able to see private tasks or private notes
