Roles and Permission in Projects

Archived

In Projects we have the following roles:

PM : Project Manager

Senior Team: Senior team can edit project team and has access to sensitive project information such as financial information (used in plug-ins)

Team : Standard team member of a project

Senior Client: Client won't be able to see private tasks, but senior client can access sensitive project information such as financial information

Client: Standard client permission that won't be able to see private tasks or private notes
