

Embed Facebook Feed into Pages

Overview

How to embed your Facebook page timeline using Embed Component on Pages (available from Claromentis 8.2).

Step 1

Go to

Facebook Page Plugin

Please note that you can only embed feed from Facebook Pages, such as company or organisation pages on Facebook and not your personal feed.

Step 2

Enter the Facebook Page URL you wish to embed, see example below.

Width: 280 if you wish to fit the embed into a single column.

Facebook Page URL	Tabs	
https://www.facebook.com/claromentis/	timeline	
Width	Height	
280	The pixel height of the embed (Min. 70)	
✓ Use Small Header	 Adapt to plugin container width 	
Hide Cover Photo	Show Friend's Faces	

What if I can't see the preview?

Please make sure the Page doesn't have any restriction at all. For example age or location restriction.

On Facebook Page, navigate to Settings and check the restriction as shown below

Step 4

Copy the code and paste it on your page by selecting **Embed** Component

Facebook Feed successfuly embeded:

Troubleshooting

4 April 2022

Some users reported that when they're logged on to Facebook, the Page news feed is showing a message:

"Sorry, something went wrong - Please try closing and re-opening your browser window."

The workaround is by logging out of Facebook in the browser and you will be able to see the public news feed, alternatively, you can simply create a link to your Facebook Page directly (and without requiring an embed) via a menu item, image or Button in your Intranet.

This issue has been reported to Meta's developer network and awaiting resolution.
