

Embed Facebook Feed on a Page

Overview

How to embed your Facebook page timeline using Embed Component on Pages (available from Claromentis 8.2).

Prerequisite

Sign up or register for Facebook Developer and create an app at <https://developers.facebook.com/apps/>

Step 1

Go to

Facebook Page
Plugin

Please note that you can only embed feed from Facebook Pages, such as company or organisation pages on Facebook and not your personal feed.

Step 2

Enter the Facebook Page URL you wish to embed, see example below.

Width: 280 if you wish to fit the embed into a single column.

Facebook Page URL

https://www.facebook.com/claromentis/

☒ Use Small Header

☒ Adapt to plugin container width

☐ Hide Cover Photo

☒ Show Friend's Faces

What if I can't see the preview?

Please make sure the Page doesn't have any restriction at all. For example **age** or **location** restriction.

On Facebook Page, navigate to **Settings** and check the restriction as shown below

Troubleshooting

29 Jan 2026

I'm seeing the header but not the feed (spinning wheel)

In some browsers, including Chrome, if the user is also logged on to Facebook, they won't be able to see the feed.

<https://developers.facebook.com/community/threads/321871286781329/>

Workaround

Use the JavaScript SDK version instead of iFrame and replace `data-tabs="timeline"` in the parameter with `data-show-posts="true"`

4 April 2022

Some users reported that when they're logged on to Facebook, the Page news feed is showing a message:

"Sorry, something went wrong - Please try closing and re-opening your browser window."

The workaround is by logging out of Facebook in the browser and you will be able to see the public news feed, alternatively, you can simply create a link to your Facebook Page directly (and without requiring an embed) via a menu item, image or Button in your Intranet.
