

Embed Google Docs, Sheets or Slides to Pages

Overview

You can make a Google document, spreadsheet, presentation, or form available to view on a Page by using Embed component.

Step 1

1. Open a file in Google Docs, Sheets, or Slides.
2. At the top, click File and then Publish to the web.

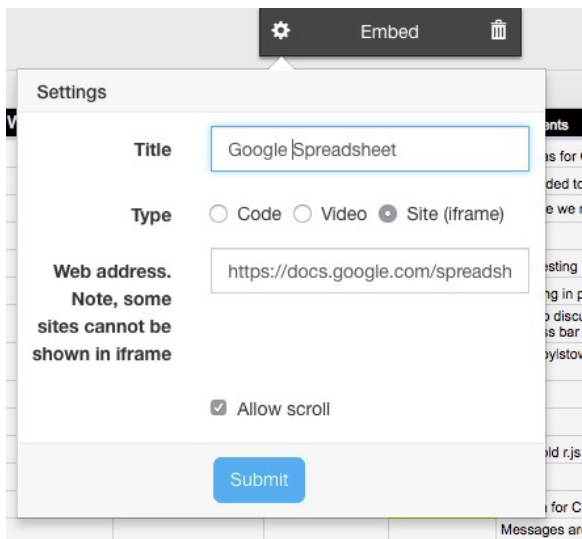

3. In the window that appears, click Link.
4. Copy the link

Step 2

Using **Embed Component**, choose **Site (Iframe)**

Paste the link into web address field

The screenshot shows a 'Settings' dialog box for an embed component. At the top, there is a dark bar with a gear icon, the word 'Embed', and a trash icon. The dialog box has a title 'Settings' and contains the following fields and options:

- Title:** A text field containing 'Google Spreadsheet'.
- Type:** Three radio button options: 'Code', 'Video', and 'Site (iframe)'. The 'Site (iframe)' option is selected.
- Web address:** A text field containing 'https://docs.google.com/spreadsh'.
- Note:** A note below the web address field states: 'Note, some sites cannot be shown in iframe'.
- Allow scroll:** A checkbox that is checked, with the label 'Allow scroll'.
- Submit:** A blue button at the bottom right of the dialog box.
