

Embed Google Docs, Sheets or Slides to Pages

Overview

You can make a Google document, spreadsheet, presentation, or form available to view on a Page by using Embed component.

Step 1

1. Open a file in Google Docs, Sheets, or Slides.
2. At the top, click File and then Publish to the web.

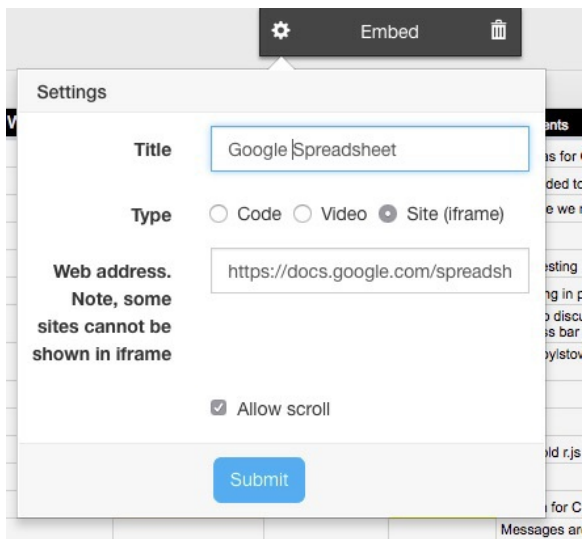

3. In the window that appears, click Link.
4. Copy the link

Step 2

Using Embed Component, choose **Site (Iframe)**

Paste the link into web address field

The image shows a settings dialog box for an 'Embed' component. The dialog has a title bar with a gear icon, the word 'Embed', and a trash icon. The main content area is titled 'Settings' and contains the following fields and options:

- Title:** A text input field containing 'Google Spreadsheet'.
- Type:** Three radio button options: 'Code', 'Video', and 'Site (iframe)'. The 'Site (iframe)' option is selected.
- Web address:** A text input field containing 'https://docs.google.com/spreadsh'.
- Note:** A warning message: 'Note, some sites cannot be shown in iframe'.
- Allow scroll:** A checked checkbox.
- Submit:** A blue button at the bottom.

Partial text from the background page is visible on the right side of the dialog, including 'ants', 'is for', 'ded to', 'e we', 'sting', 'ng in p', 'o disc', 's bar', 'y/stov', 'ld r,js', 'for C', and 'Messages an'.
