

People List

Requirements

This user guide is for anyone on Claromentis 8.2+

Introduction

This article will showcase the features of the people list in the People application and how to locate specific users.

The information below is outlined in the video.

People list

When first accessing the People application, the people list page will be the first area you enter:

The screenshot displays the 'People' application interface. At the top, there's a header bar with the title 'People' and a series of icons for various functions. Below the header is a search bar with a dropdown arrow and a magnifying glass icon. To the right of the search bar are two view toggle buttons: a list view icon and a card view icon. Below the search bar is a horizontal navigation bar with letters A through Z, each in a different color, and a 'First name, Surname' filter icon. The main area of the interface is a grid of user cards. Each card features a circular profile picture, the user's name, and their job title. The cards are arranged in a 5x3 grid. The users listed are: Abigail Clark (Human Resources Assistant), Alan Metcalfe (Sales Assistant), Alison Kelly (Human Resources Assistant), Amelia Jackson (Human Resources Assistant), Anne Wilkins (Sales Director), Austin Glover (Marketing Executive), Barclay Martin (Sales & Training Manager), Brian MacDonald (Marketing Executive), Charles Johnston (Marketing Director), Claire Bond (Testing Manager), Claromentis Administrator (System Administrator), Claromentis Test, Connor Chapman (Human Resources Assistant), Dan Butler (Support Technician), and Dave Arril (Head Of Sales).

People search

From the people list page, you can search for specific users and view their profiles.

Users can search through the different pages by their name or specific letters of the user's first name, and can list users alphabetically by surname instead of the first name.

Another option to search for users will be to use the 'Advanced Search' option.

The Advanced Search will give you a variety of methods determined by the administrators. This will be a useful option allowing for more in-depth ways to locate a specific user.
