

# OnPremise Staging Server Refresh

## OnPremise Server Refresh

Description:	The work is to replace all data (database, data and application files) on Staging server with data taken from Production (Live) server. Staging-specific configuration (like DB host, passwords etc.) will be re-applied.
Pre-conditions:	<ul style="list-style-type: none"><li>- Agreement from the client that the staging content and version will be replaced by the Live content and version</li><li>- Completed 'pre-flights' check</li></ul>
Estimate:	<p>Pre-flights check: 1 hr</p> <p>Refresh: 0.5 - 1.5 hrs</p>
Constraints:	<ul style="list-style-type: none"><li>- If transfer of data cannot be completed during the initial 'pre-flight' check, an agreed method of transferring data between servers will be required</li><li>- Rollback of staging server is not available</li></ul>
Acceptance criteria:	Staging site in the same state as Production from the point of data transfer.
Downtime:	Staging downtime 0.5 - 1.5 hrs
Resources required:	PM, Support Engineer. Client's tech resource
