

## OAuth2 Applications module walkthrough

### Overview

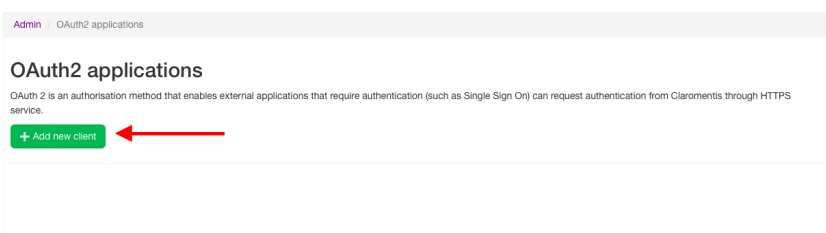

OAuth2 Applications module is developed to enable access to third-party applications through Claromentis intranet.

In this walk-through, we are using 'RocketChat' which is located on a fictitious <https://test.application.com> server as an example of a third-party application. In this example, Intranet is located on <https://workplace.myintranet.com>

### Step 1. Go to Admin > OAuth2 Applications

### Step 2. Create a new application within the module

### Step 3. Populate the panel with relevant information

### Create new OAuth2 client ✕

**Client Name** e.g. Rocket Chat

Human-readable client/app name, this is shown to the User on the permissions confirmation screen. **Choose wisely, you will not be able to change it**

**Authorised Redirect URIs**

https://test.application.com

One URI per line. Needs to have a protocol, no URL fragments, and no relative paths.

Cancel
Save

## Step 4. Once saved, please review the config on Claromentis

### OAuth2 applications

OAuth 2 is an authorisation method that enables external applications that require authentication (such as Single Sign On) can request authentication from Claromentis through HTTPS service.

[+ Add new client](#)

<b>Client Name</b>	Rocket Chat
<b>Client ID</b>	MhXWGU8l1TnNekwctrFUVsmzyvGXbN1M9C3NHngkL4m8wiHNmJ3dEuJUCE3J
<b>Client Secret</b>	f2BmIk2XvYbt6jwmlK32RFAMqimq
<b>Redirect URIs</b>	<a href="https://test.application.com">https://test.application.com</a>

## Step 5. Configure the external application to work with Intranet (example)

Please note that each third-party application will have their own configuration interface.

Here are the specifics for each field. Items in quotes must be entered exactly as they appear

- URL - please place the url of your intranet
- Token Path - "/oauth2/access\_token"
- Token Sent Via - "Header"
- Identity Token Sent Via - "Header"
- Identity Path - "/oauth2/user"
- Authorize Path - "/oauth2/auth"
- Scope - please leave empty
- ID and Secret are copied from step 4
- Username field - "name\_slug"
- Login Style - "Popup"

The following three fields are optional configuration, which would vary from application to application

- Button Text/Text Color/Color - please adjust as required for visual representation in step 6

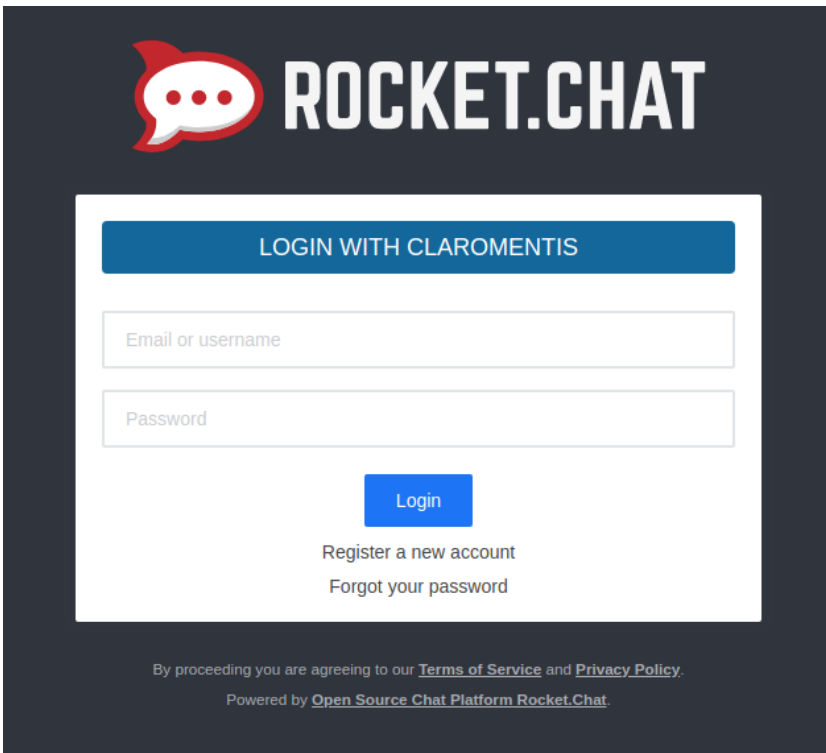

**Custom OAuth: Claro** COLLAPSE

When setting up your OAuth Provider, you'll have to inform a Callback URL: e.g. https://test.application.com/\_oauth/claro

Enable	<input checked="" type="radio"/> True <input type="radio"/> False	<span style="color: red;">⊗</span>
URL	<span style="border: 1px solid red; padding: 2px;">e.g. https://workplace.myintranet.com</span>	<span style="color: red;">⊗</span>
Token Path	/oauth2/access_token	<span style="color: red;">⊗</span>
Token Sent Via	Header	<span style="color: red;">⊗</span>
Identity Token Sent Via	<span style="border: 1px solid red; padding: 2px;">Header</span>	<span style="color: red;">⊗</span>
Identity Path	/oauth2/user	<span style="color: red;">⊗</span>
Authorize Path	/oauth2/auth	<span style="color: red;">⊗</span>
Scope		<span style="color: red;">⊗</span>
Id	MhKwGj8in1TnWkKwctFUVzmvzVYGzdv1M6C3NhnqkL4mbwHmJ3eUJCESJ	<span style="color: red;">⊗</span>
Secret	i2BMIKXvYt8tYenL32RFAMqmq	<span style="color: red;">⊗</span>
Login Style	Popup	<span style="color: red;">⊗</span>
Button Text	Login with ClaroMentis	<span style="color: red;">⊗</span>
Button Text Color	#FFFFFF	<span style="color: red;">⊗</span>
Button Color	#13679A	<span style="color: red;">⊗</span>
Username field	name_slug	<span style="color: red;">⊗</span>
Merge users	<input checked="" type="radio"/> True <input type="radio"/> False	<span style="color: red;">⊗</span>
Reset Section Settings	<span style="background-color: red; color: white; padding: 2px 5px;">RESET</span>	

### Step 6. Review the third-party application access

You can now either create a fast access button or menu link to the application and run it.

For any additional information and configuration help, please contact your onboarding specialist, project manager or support team.
