

Configuring Web Push Notification with OneSignal

If you have a custom / branded mobile app for your organisation it is likely that OneSignal has been configured as part of Mobile Push Notification. Please [contact our Support team](#) to learn more.

OnPremise: Please make sure your firewall is allowing connection to <https://onesignal.com> to send push notification payload.

What is a web push notification?

You may have seen this when you visited a website and it prompts you to send notification?
here is what the prompt often it looks like,

It sent notification to you even if you are not actively on that website.

Here is an example prompt in the desktop computer:

What is OneSignal?

OneSignal allows a push notification from the Internal messaging within claromentis to be relayed to OS or compatible Browser (Chrome & Firefox) as well as used on Mobile push Notification.

Mobile Push Notification on iOS and Android requires the development of [Custom Mobile App](#)

Requirements

Claromentis version 8.6+

OneSignal Account - [Sign Up Here](#)

SSL enabled Claromentis URL for example: <https://companyname.myintranet.com>

Web Push

1. Once logged on to OneSignal create an app by clicking **"add app"** button.
2. Select Web Push and complete the form.

The screenshot shows the 'Site Setup' and 'Permission Prompt Setup' sections of the OneSignal configuration interface. The 'Site Setup' section includes fields for 'SITE NAME' (hvacad), 'SITE URL' (https://hvacad.myintranet.com), and 'DEFAULT ICON URL'. The 'Permission Prompt Setup' section includes a table with columns for 'NAME', 'APPEARANCE', and 'ACTION', and a 'PROMPTS' section with instructions.

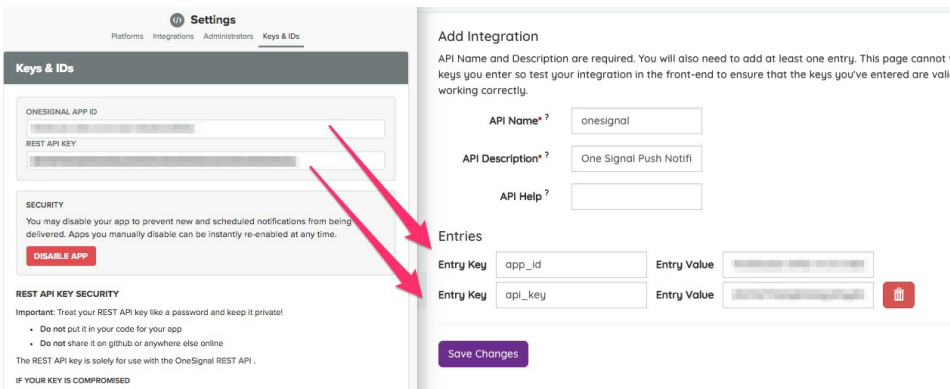

NAME	APPEARANCE	ACTION
Slide Prompt	All Pages	Opens Slide Prompt

3. You will be asked to download SDK files and add code to your website, you can simply ignore this step below and click **Finish**"

The screenshot shows the 'Configure Web Push' section of the OneSignal configuration interface. It includes sections for 'Upload Files', 'Add Code to Site', and 'Add your first user'. A red arrow points to the 'FINISH' button at the bottom left.

```
<!-- ... -->
<link rel="stylesheet" href="//cdn.onesignal.com/onesignal.min.js" />
<script src="//cdn.onesignal.com/sdk/onesignalSDK.js" async="">
</script>
var onesignal = window.onesignal || {};
onesignal.push(function() {
  onesignal.start();
});
</script>
</head>
```

4. Still at OneSignal navigate to **"Keys and IDs"** from the top menu and make note of APP ID and REST API Key which you needs to enter in Claromentis.

5. Navigate to [Claromentis Admin / System / API keys](#) and click on **"Add a new integration"**

API Name: `onesignal`

API Description: `One Signal Push Notification`

Entry Key: `app_id`

Entry Value: {paste the app ID from onesignal}

Entry Key: `api_key`

Entry Value: {paste REST API key from onesignal}

6. Test sending web push notification from onesignal
