Snow Component

Overview

Christmas is upon us so why not jazz up your page with Snow Component and here is how.

Minimum requirement:

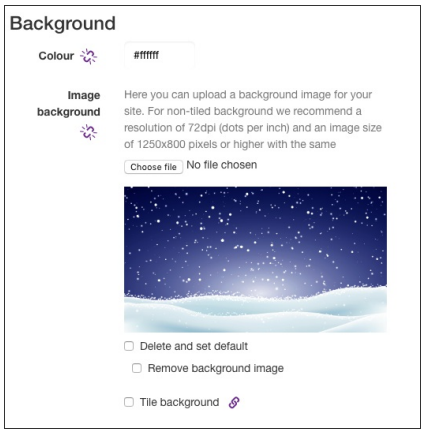
Claromentis 8.3

Step 1: Changing Intranet Background

Navigate to `Admin > Design`

Choose the selected theme you wish to change or edit Master Design
Navigate to Edit Style and change background using the example below which you can download here.

Download Background



Step 2: Download and Install Snowfall custom component

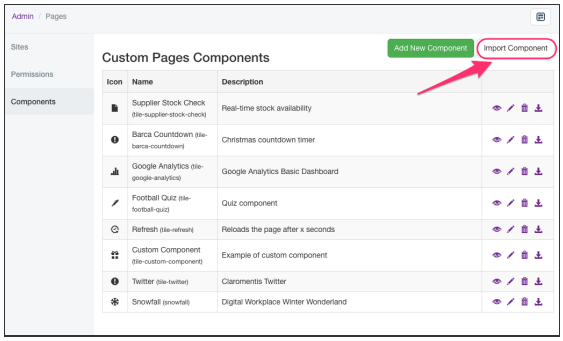
We have prepared a snowfall pages custom component which you can download below.

Download Snowfall Component

Step 3: Installing Snowfall component

Navigate to `Admin > Pages > Component`

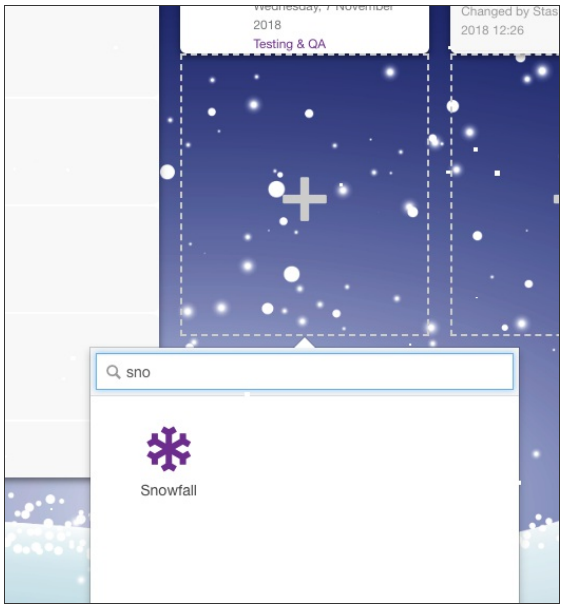
choose Import component and import the zip file that you have just recently downloaded.



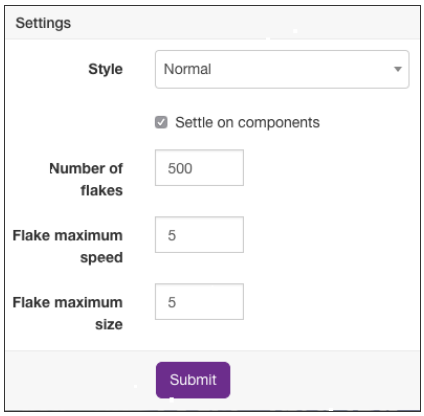
Step 4: Adding Snowfall component to a homepage

Edit the homepage, click on the space you wish to add new component and search for Snowfall.

(Please note: Performance of the component is optimal when placed at the top of a page)



Step 5: Configure the settings according to your preference



Step 6: Publish the page

... and make your page a winter wonderland..!

enjoy.
