

Snow Component

Overview

Christmas is upon us so why not jazz up your page with Snow Component and here is how.

Minimum requirement:

Claromentis 8.3

Step 1: Changing Intranet Background

Navigate to [Admin > Design](#)

Choose the selected theme you wish to change or edit Master Design

Navigate to Edit Style and change background using the example below which you can download [here](#).

[Download Background](#)

Step 2: Download and Install Snowfall custom component

We have prepared a snowfall pages custom component which you can download below.

[Download Snowfall Component](#)

Step 3: Installing Snowfall component

Navigate to [Admin > Pages > Component](#)

choose Import component and import the zip file that you have just recently downloaded.

Step 4: Adding Snowfall component to a homepage

Edit the homepage, click on the space you wish to add new component and search for Snowfall

Step 5: Configure the settings according to your preference

Settings

Style

Settle on components

Number of flakes

Flake maximum speed

Flake maximum size

Step 6: Publish the page

... and make your page a winter wonderland..!

enjoy.
