

## Multilingual Category Name

This feature is available from Knowledge Base v3.6.0+ in Claromentis 8.6

### Step 1: Rename the existing category

From the Knowledgebase admin panel, edit category name to the following multi-lingual format.

@{appname.section.name|Display Name}

For knowledgebase, we suggest inserting ↓

@{kbase.cat.name|DisplayName}

Here is an example for a category name "Office"

#### Edit Category

Parent Category	- no parent- ▾
Category name	@{kbase.cat.office Office}

### Step 2: Adding Localisation Key

Navigate to [Admin > System > Localisation](#)

Under the 'Your changes' section, click on Core Apps:

[Admin](#) / [System](#) / Localisation

General

Administrators

License

Date and Time

Background Services

**Localisation**

Configuration

Labs

### Localisation

Localisation and translation preferences for the system and applications.

Edit localisation	Your changes	Original
Core Apps (News, Blog, Documents, InfoCapture ...)	Core Apps (News, Blog, Documents, InfoCapture ...)	Core Apps (News, Blog, Documents, InfoCapture ...)
Assets	Assets	Assets
Audit	Audit	Audit
Buttons	Buttons	Buttons
Countdown	Countdown	Countdown
Discuss	Discuss	Discuss

Right-click to add a new phrase:

Edit in popup

Delete

Add phrase

Restore this phrase

Mark as modified

Enter the translation. Here is an example:

Type

☒ For PHP/JS (lm)
 ☐ For template (lt)

Key

kbase.cat.office

Aux

English

Office

U.S. International

Russian

офис

French

Bureau

German

Büro

Portuguese (Brazil)

Spanish

Dutch

Czech

Polish

Greek

Arabic

Kurdish

Save

Click 'Save' at the bottom of the list page and close the window once you're done.

### Step 3: Test!

Navigate back to the Knowledge Base application to check the category name and try changing your settings to a different language.
