

Multi Lingual Category Name

This feature is available from Knowledge Base v3.6.0+ in Claromentis 8.6

Step1: Rename existing category with the following format

From Knowledge Base admin panel edit category name to the following multi-lingual format

```
@{appname.section.name|Display Name}
```

for knowledge base we suggest to put

```
@{kbase.cat.name|DisplayName}
```

here is an example for a category name "Office"

Edit Category

Parent Category	<input type="text" value="- no parent -"/>
Category name	<input type="text" value="@{kbase.cat.office Office}"/>

Step 2 Adding Localisation Key

Navigate to [Admin > System > Localisation](#)

Under Your changes click on Core Apps...

Admin / System / Localisation

Localisation

Localisation and translation preferences for the system and applications.

Edit localisation	Your changes	Original
Core Apps (News, Blog, Documents, InfoCapture ...)	Core Apps (News, Blog, Documents, InfoCapture ...)	Core Apps (News, Blog, Documents, InfoCapture ...)
Assets	Assets	Assets
Audit	Audit	Audit
Buttons	Buttons	Buttons
Countdown	Countdown	Countdown
Discuss	Discuss	Discuss

Right click to add new phrase

- Edit in popup
- Delete
- Add phrase
- Restore this phrase
- Mark as modified

Enter the translation, here is an example

Type	<input checked="" type="radio"/> For PHP/JS (Im) <input type="radio"/> For template (It)
Key	<input type="text" value="kbase.cat.office"/>
Aux	<input type="text"/>
English	<input type="text" value="Office"/>
U.S. International	<input type="text"/>
Russian	<input type="text" value="офис"/>
French	<input type="text" value="Bureau"/>
German	<input type="text" value="Büro"/>
Portuguese (Brazil)	<input type="text"/>
Spanish	<input type="text"/>
Dutch	<input type="text"/>
Czech	<input type="text"/>
Polish	<input type="text"/>
Greek	<input type="text"/>
Arabic	<input type="text"/>
Kurdish	<input type="text"/>

Click Save button at the bottom of the list page and close the window once you're done.

Step 3 Test!

Navigate back to the Knowledge Base application to check the category name and try changing your settings to different language.
