# Adding Google Translate

## Overview

Google translate provides a convenient way to translate content, although Google no longer provides new access to useGoogle Website Translator, you can still implement a drop-down to change the content of your intranet page.

Step 1: Navigate to Admin > System > Script

= claron	nentis	<b>Q</b> What are you looking for?	109:18	യ	R			<u>@</u> .	0
Admin / System / Scripts									
🏟 General	Third-party Scripts Third-party tools and external scripts can be added here. Code will be injected into parts of the page listed below. Please use with caution. Third-partu code as well as any invalid markup may interfere with your system.								
Administrators									
C License									
<ul> <li>Date and Time</li> </ul>	Inside the <head> tag <pre></pre> <pre></pre></head>								
Background Services	<style> #google_translate_element_position { position:fixed; bottom:30px; right:15px; z-index:9999999999; } </style>								
词 Localisation									
⊁ Configuration	Please note that cheads tag can only contain the following elements: citiles, cstyles, cbases, clinks, cmetas, cscripts, cnoscripts								
🛆 Labs	Arter <body> opening tag</body>								
Integrations									
< > Scripts									
<ul> <li>API keys</li> </ul>	Before  closing tag								
🖾 Mailgun	<pre><div google_translate_elemen<="" id="google_translate_e&lt;br&gt;id=" pre=""></div></pre>	element_position" class="hidden- nt">	-sm hidden->	s"> <div< th=""><td></td><th></th><th></th><td></td><td></td></div<>					
њ LDAP	<pre><script type="text/javascr:&lt;br&gt;function googleTranslateElu&lt;br&gt;new google.translate.Tran&lt;br&gt;'bg,bs,ca,co,cs,cy,da,de,e&lt;/pre&gt;&lt;/td&gt;&lt;th&gt;ipt"></script></pre>								

### Step 2: Paste the following code inside the <head> tag

Please be aware you may have existing scripts such as Google analytics code, place it at the bottom.

### Step 3: Paste the following code inside Before </body> closing tag

<div id="google\_translate\_element\_position" class="hidden-sm hidden-xs"><div id="google\_translate\_element"></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></div></ti>

This is to hide the Google Translate drop-down for the small screen to avoid usability issues.

Click save and check the homepage.

#### **Customisation options**

#### 1. Position the dropdown

By default the dropdown will be position at the bottom right corner this can be changed to suit your needs by changing the value in the CSS inside the <head> tag

Modify CSS inside the <head> tag to the following by replacing bottom: 60px; to top:76px; Inside the <head> tag if you wish to position the dropdown in the Top Right corner.

```
<!-- Google Translate Element for Desktop only -->
<style>
#google_translate_element_position {
position:fixed; top:76px; right:15px; z-index:9999999999;
}
</style>
```

#### 2. Language Options

You can choose which language to display by adding or removing two digits language code into the above arrays.

Here is an example of adding includedLanguages containing Spanish, French and Italian in the <head> tag

```
includedLanguages: 'es,fr,it',
```

```
<!-- Google Translate Script -->
<script type="text/javascript">
function googleTranslateElementInit() {
    new google.translate.TranslateElement({pageLanguage: 'en', includedLanguages: 'es,fr,it', layout: google.translate.TranslateEl
ement.InlineLayout.SIMPLE}, 'google_translate_element');
}
</script>
```
