Apple Developer Enterprise Programme

Archived

BACKGROUND

If your Claromentis system is intended only for the employee or internal member of the organisation, Apple Guideline prohibits to have the mobile app to be published in AppStore.

A generic (non-branded) Claromentis app is available on Public AppStore.

> Guideline 3.2 - Business
>
> We found that your app is an in-house app, intended for employees or members of your organization.
> As such, it is not appropriate for the App Store.
> For information on distributing proprietary, in-house apps, please refer to the Apple Developer Enterprise Program.

ENTERPRISE DISTRIBUTION

Application distributed through Enterprise Distribution is not available through **Public Apple AppStore**.

Unless it is requested otherwise, we will sign and publish your app using our **Enterprise Distribution** so that you can distribute within the organisation through MDM. There will be an additional security check on the user's mobile phone to trust **Claromentis Ltd**.

Claromentis will only distribute a signed and secure app through the Apple Developer Programme.

The expiration date of Distribution Certificate in Apple Developer Enterprise Program is 3 years.

INVITING CLAROMENTIS TO YOUR ENTERPRISE TEAM

If your organisation has or enrolled to Apple Developer Enterprise Programme please invite **mobile@claromentis.com** to your team so that we can sign and distribute claromentis mobile app through your Organisation Enterprise Programme.

The mobile source code can also be provided upon request if your organisation would like to build and distribute the app internally.
