

Events FAQ's

Why can't I select a Google Map location for my Event?

If you see an error or cannot select a location this means that the Google Map API has not been set up on your site, as this facilitates selecting locations in Events the Weather component.

If your site is self-hosted, you can set up the API yourself following our guide.

If your site is hosted by us, we can set this up for you, so please submit a support ticket requesting this.

Can I change the wording of the 'notes to organiser..' pop-up that appears when joining an Event?

Yes, this can be targeted in the Events area of the localisation and updated to your preferred phrasing.

note					
Status	Typ...	Key	Aux	English	U.S. International Russian
im	events	joined_users_list_note		Note	Примечание
im	events	registry_note		Note	Примечание
it	events.admin_users_list	organisers_note.body		Note to organisers, including special needs an...	Примечание для орг...
it	events.admin_users_list	organisers_note_optional.body		optional	необязательный

Be sure to clear all caches before testing after making changes to the wording, otherwise the previous may persist.
