

How to use Code Syntax Highlighter in Knowledge Base

# What is Code Syntax Highlighter?

Syntax Highlighter is a feature of text editors that are used for programming, scripting, or markup languages, such as HTML. The feature displays text, especially source code, in different colours and fonts according to the category of terms.

# How to enable it?

https://prismjs.com/

It is possible to use third-party syntax highlighter plug-ins provided by PRISM for instance to a Knowledge Base article.

## Step1: Edit CKEditor configuration

Navigate to Labs > Edit CKEditor configuration (under Other)

Labs	
1 These tools are experimental features	
Impersonate user	
Select user	Browse     Impersonate user
Maintenance	Design
▲ Delete all caches	olyphicons Finder
<b>≣</b> <sup>®</sup> Delete data cache	I Style Reference
🕅 Delete localisation cache	Other
Ø Delete component cache	🚬 Import data snapshot
🗹 Documents metadata integrity check	🛃 Export data snapshot
Synchronise local storage with CDN	Check server configuration
	C Edit CKEditor configuration

```
config.extraAllowedContent += 'code(language-*);';
```

Click Save

### Step 2: Adding Javascript Plugin from PRISM

Navigate to Admin / Scripts

#### Third-party Scripts

#### Copy and paste the following plug-ins Before </body> closing tag

<link href="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/themes/prism.min.css" rel="stylesheet" />
<script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/prism.min.js"></script>
<script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/plugins/autoloader/prism-autoloader.min.js"></
script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/plugins/autoloader/prism-autoloader.min.js"></script>
</script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/plugins/autoloader/prism-autoloader.min.js"></script>
</script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/plugins/autoloader/prism-autoloader.min.js"></script>
</script src="https://cdnjs.cloudflare.com/ajax/libs/prism/1.19.0/plugins/autoloader/prism-autoloader.min.js"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></scri

click Save.

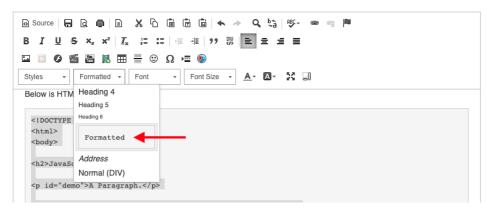

# How to use it?

Here is an example on how to use it in the Knowledge Base article

### 1. Paste the code in the rich-text area

ତ Source   🔒 🖸 💼 🖹 🕹 着 🛱 🛱 🛱 📥 🔶 🔍 🎭 🔍 🎭 🧠 🛤 🛒		
B I U S ×₂ ײ II → I → I → I → I → I → I → I → I → I		
🖾 💿 🖉 🎬 🗮 🗮 😳 Ω 🛏 🜒		
Styles - Normal - Font - Font Size - A - A - S		
Below is HTML Code		
html <html> <body></body></html>		
<h2>JavaScript in Body</h2>		
A Paragraph.		
<button onclick="myFunction()" type="button">Try it</button>		
<script> function myFunction() { document.getElementById("demo").innerHTML = "Paragraph changed.";</th></tr><tr><td>}</td></tr><tr><td></script>		
body p		

### 2. Highlight the code and change it to Formatted

3. Keeping them highlighted under Style select Computer Code

ම Source   🖬 Q 👼   ම 🐰 වි 菌 🛱 🖬 🔺 🔶 Q 🧞   💖- ා ා ා 🛤
B I U S ×₂ ײ I <sub>x</sub> ≔ ≔ ≕ ≢ 99 ಔ È ≐ ≡ ≡
🖬 🖻 🖉 🎬 😹 🎛 🖶 🖶 😳 Ω 🖼 🛞
Styles - Formatted - Font - Font Size - A - D - S
Alert Danger
Inline Styles
Computer Code
Marker a Body
Big <pre><pre>p id="demo"&gt;A Paragraph.</pre></pre>
 sutton type="button" onclick="myFunction()">Try it

### 4. Switch to view the Source

Add a class to the code tag to specify the applicable language, for example class="language-html"

#### 5. Save and Update Article

# HTML Code

Follow

Below is HTML Code

html <html> <body></body></html>
<h2>JavaScript in Body</h2>
A Paragraph.
<button onclick="myFunction()" type="button">Try it</button>
<script> function myFunction() { document.getElementById("demo").innerHTML = "Paragraph changed."; } </script>  
Created on 17 March 2020 by Claromentis Administrator

Please note that currently syntax highlighting will only visible when you view the document either in Draft orr Publish status
