

Statistics

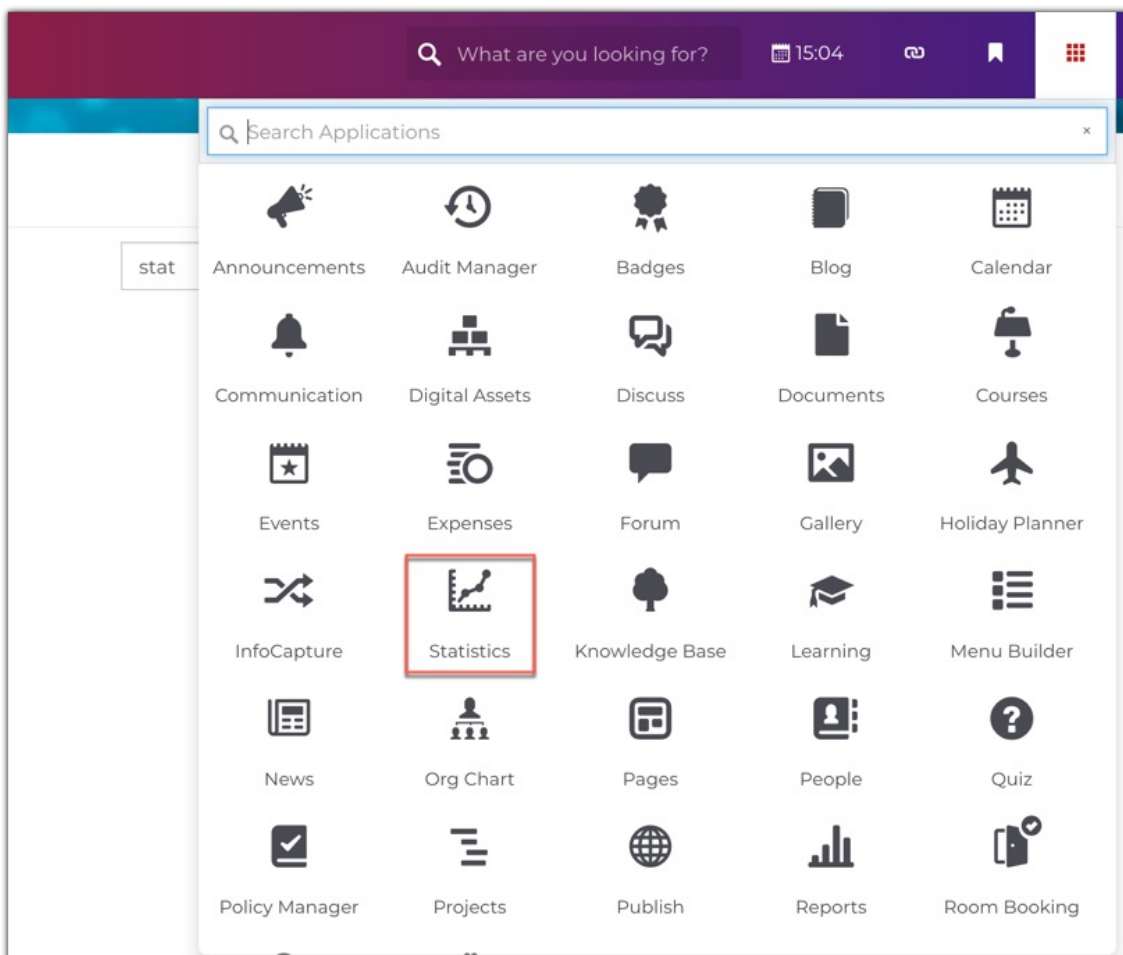

Archived

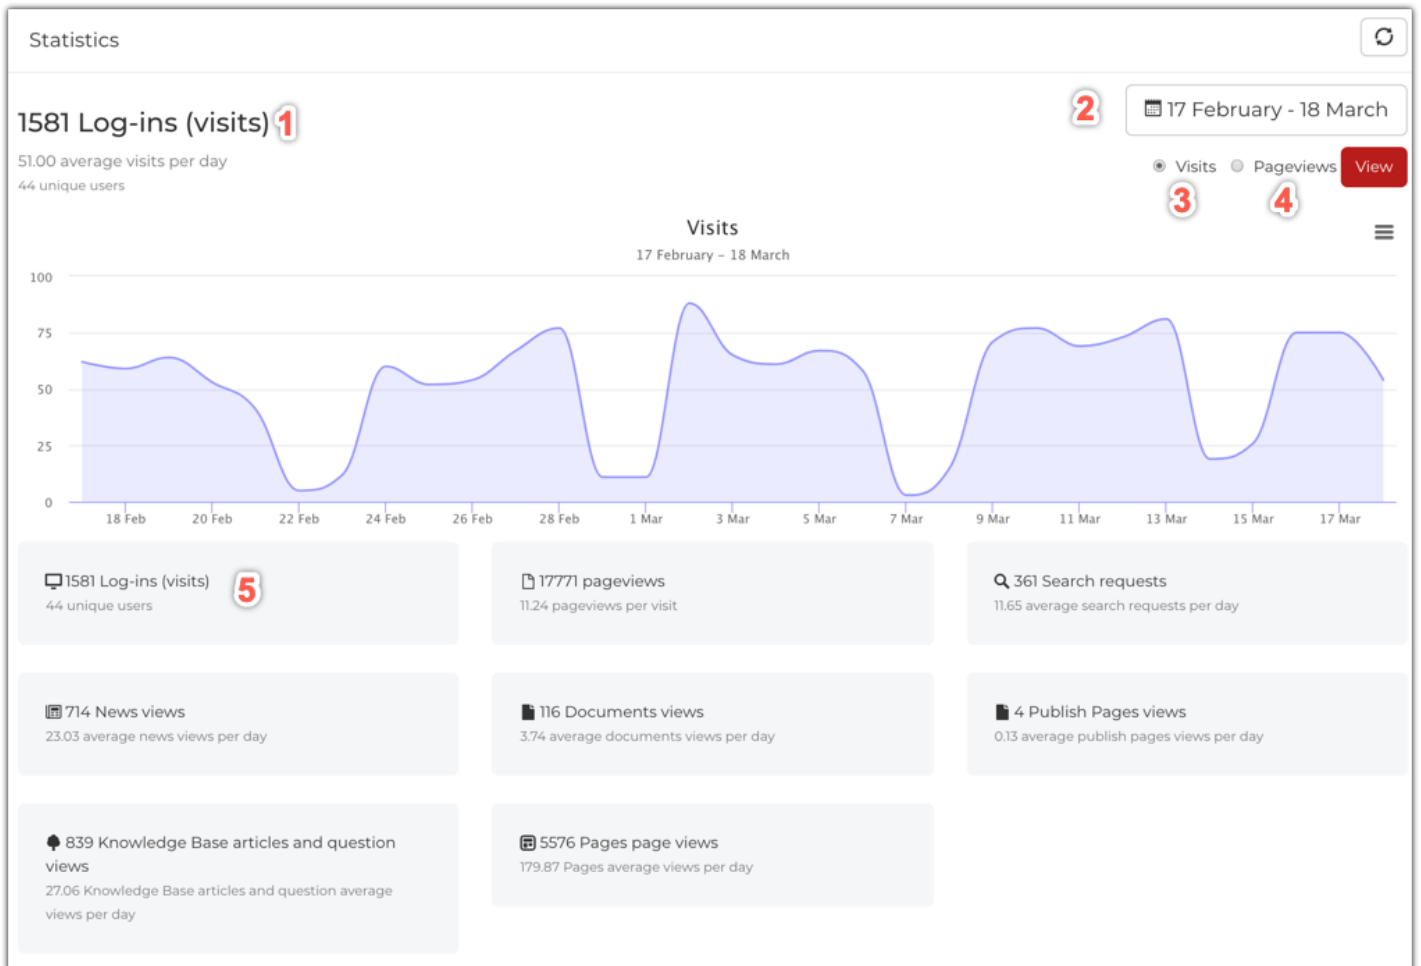

This article will guide you through each element of the Statistics Application available in Claromentis 8.9+

The statistics application gives analytical highlights of the sites main engagement metrics, these include

- Log ins
- Page views
- Search requests
- News views
- Document views
- Knowledge base views

It can be found here:

1- The number of site visits in the defined time frame (this will include repeat visitors - unique visitors is listed just below)

2- The current defined time frame - here we have specified a month. When choosing a time frame - you are able to compare two different date ranges if desired - this will add a dotted line like so:

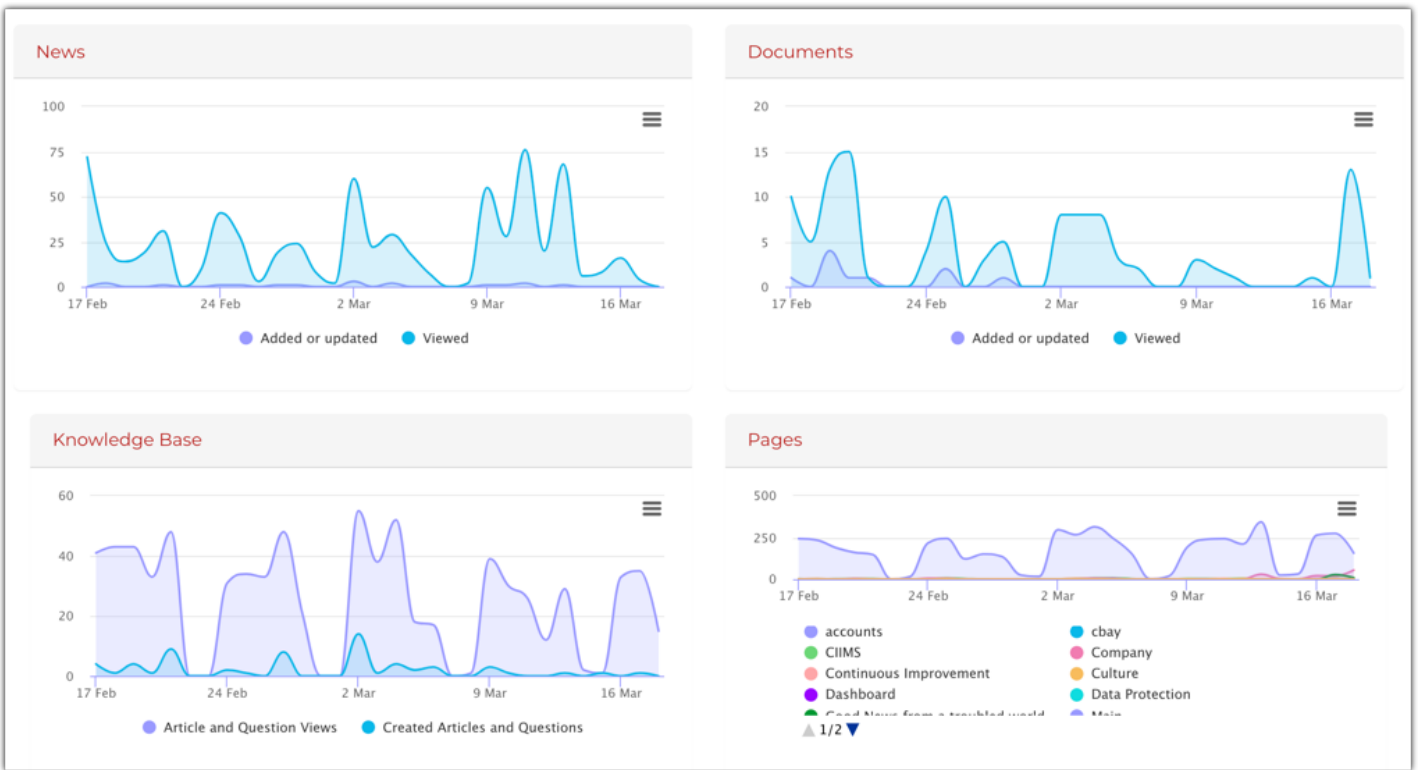

3- Here you can choose what the graph should show. 'Visits' is the number of different people who used the site

4- 'Page views' on the other hand, is the number of individual pages that have been viewed

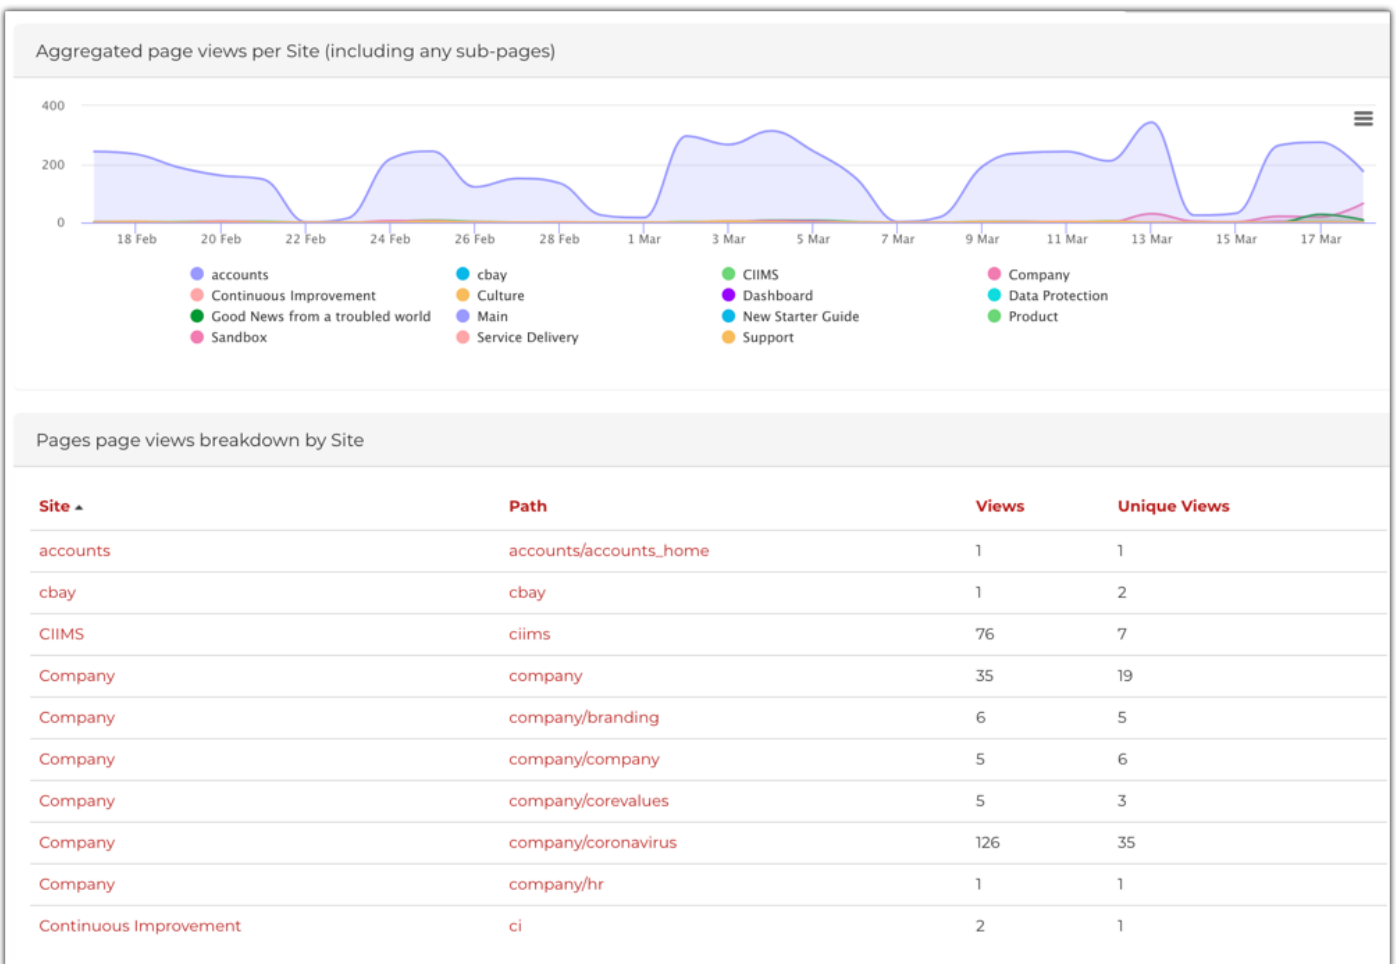

5- These tiles show helpful snapshot of data for the time frame selected.

The second half of this page shows the 4 core areas for statistics;

- News
- Documents
- Knowledge Base
- Pages

Clicking on any of the red headings, will reveal some further analytics on these applications like so:

See how this information can feed into overall site engagement reporting here.
