

This article will guide you through each element of the Statistics Application available in Claromentis 8.9+

The statistics application gives analytical highlights of the sites main engagement metrics, these include

- Log ins
- Page views
- Search requests
- News views
- Document views
- Knowledge base views

It can be found here:

1- The number of site visits in the defined time frame (this will include repeat visitors - unique visitors is listed just below)

2- The current defined time frame - here we have specified a month. When choosing a time frame - you are able to compare two different date ranges if desired - this will add a dotted line like so:

3- Here you can choose what the graph should show. Visits' is the number of different people who used the site

4- 'Page views' on the other hand, is the number of individual pages that have been viewed

5- These tiles show helpful snapshot of data for the time frame selected.

The second half of this page shows the 4 core areas for statistics;

- News
- Documents
- Knowledge Base
- Pages

Pages page views breakdown by Site

Site -	Path	Views	Unique Views
accounts	accounts/accounts_home	1	1
cbay	cbay	1	2
CIIMS	ciims	76	7
Company	company	35	19
Company	company/branding	6	5
Company	company/company	5	6
Company	company/corevalues	5	3
Company	company/coronavirus	126	35
Company	company/hr	1	1
Continuous Improvement	ci	2	1

See how this information can feed into overall site engagement reportinghere.
