

Announcements Change Log

Archived

1.1.6 - 7th March 2022

- Removed the All registered users from the target users field by default when creating a new announcement.

1.1.5 - 29th November 2021

- Bugfix: Overlay bold abstract text not shown

1.1.4 - 9th November 2020

Bug Fixes

- Component options could cause layout issues with Pages

1.1.3 - 2nd Novemeber 2020

Improvements

- Changed PHP compatibility to allow PHP 7.3 and above.

1.1.2 - 21st August 2020

Bug fixes

- Announcements are no longer shown on the forced password change page. This is to prevent a situation where the user cannot dismiss an announcement because they haven't changed their password, and cannot change their password because they have not dismissed the announcement.

1.1.1 - 14th August 2020

Bug fixes

- Notifications for announcements with future publish start dates are now sent on the start date/time and not on creation

1.1.0 - 4th August 2020

Features

- Added announcement list pages component

1.0.1 - 17th March 2020 ♣

Bug fixes

- Fixed announcements not showing on the calendar page
- Changed styling of frontend announcements module to allow links to be displayed

- Hidden Acknowledgement progress bar those announcements which don't require it
- Fixed error where lines break at the wrong place
- Swapped localisation of 'Acceptance' in the list of announcements page to 'Acknowledged'.
- Fixed issue where bullet points don't take on announcement colour correctly.
- Users who are in both a group and its parent group will no longer cause the viewed/accepted percentage to be more than 100%
- removed custom 'Dismiss' button opacity which caused it to be hard to read and changed link text in overlay banners to white so they're readable
- Users will no longer be shown the same announcement twice when they are a member of two targeted groups
- Removed custom 'Dismiss' button opacity which caused it to be hard to read and changed link text in overlay banners to white so they're readable
- Announcements with a language now only count users of that language when calculating view and acceptance percentages

1.0.0 - 22/01/2020

New features

- Administrators can now create and target system-wide announcements
- Emails can be sent to an announcement's targeted users when it is created or updated
- Announcements can require agreement to be dismissed
- Announcements can be displayed in three ways: banner (does not prevent usage of the site), overlay (makes usage of the site awkward) and modal (completely prevents usage of the site until dismissed)
