

Permissions diagram

Click on the below image to see it enlarged in a new window:

Application Administrators

- Highest level of access for individual **applications**
- Only Individuals can be added (no groups or roles etc)
- For example, HR managers may need to manage the People application, whereas content managers will be in charge of creating news articles etc.

2

Users/viewers

- Anyone with these permissions can view the item
- Groups and roles can be added here
- Some departments may not need to see other departments' news/blogs/pages, so viewing can be set to what's relevant to the team/individual
