

## How to Publish SCORM Content in Easy Generator

This guide shows you how to choose the right settings for publishing SCORM content in [Easy Generator](#) so you can import it to your Claromentis site. You will have to publish content as SCORM version 1.2.

A SCORM package is a complete zip file containing all elements of an eLearning course. When added to the courses section of the intranet as a module, users can take the course and their progress is tracked.

Easy Generator is a very easy-to-use and sophisticated eLearning software, and we currently produce all our own courses with it. [Because of this partnership, we have a discount code available to use with Easy Generator for our customers to use, which is: Claro10](#)

Consider purchasing with Easy generator and use it to create your company's course content and guarantee beautiful courses in Claromentis.

To see an example course built on EG, please [click here](#).

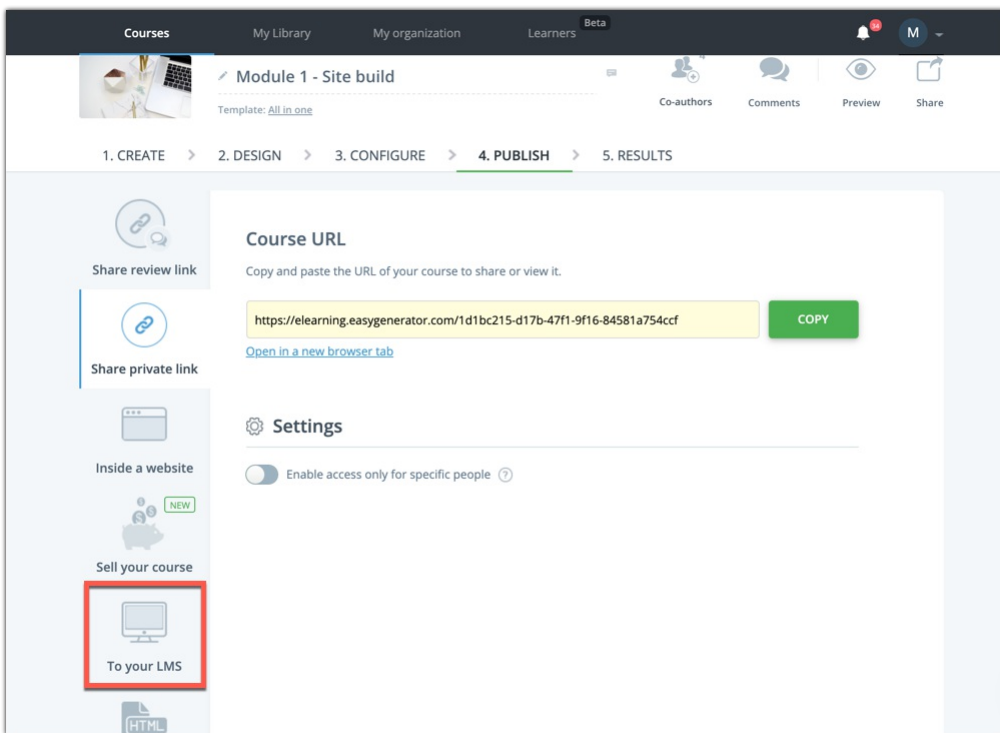

### Creating SCORM 1.2 Package

When you have finished creating the course, you will want to navigate to heading number 4, which is 'Publish'

A screenshot of the Easy Generator web application interface. The top navigation bar includes 'Courses', 'My Library', 'My organization', 'Learners', and 'Beta'. The main content area is titled 'Module 1 - Site build' and shows a progress bar with five steps: 1. CREATE, 2. DESIGN, 3. CONFIGURE, 4. PUBLISH (highlighted with a red box), and 5. RESULTS. Below the progress bar, the 'Course introduction' section contains a 'Course introduction (click to customize)' block. The 'Sections' section lists several items: 'Permissions' (with a learning objective and last edited date), 'Permissions explained', 'Example process', 'Admin vs Front-End', and 'Quiz: Match the permission levels!'. A left sidebar contains various content and question types like 'New section', 'Existing sections', 'Content', 'Single choice', 'Multiple choice', etc. A chat icon is visible in the bottom right corner.

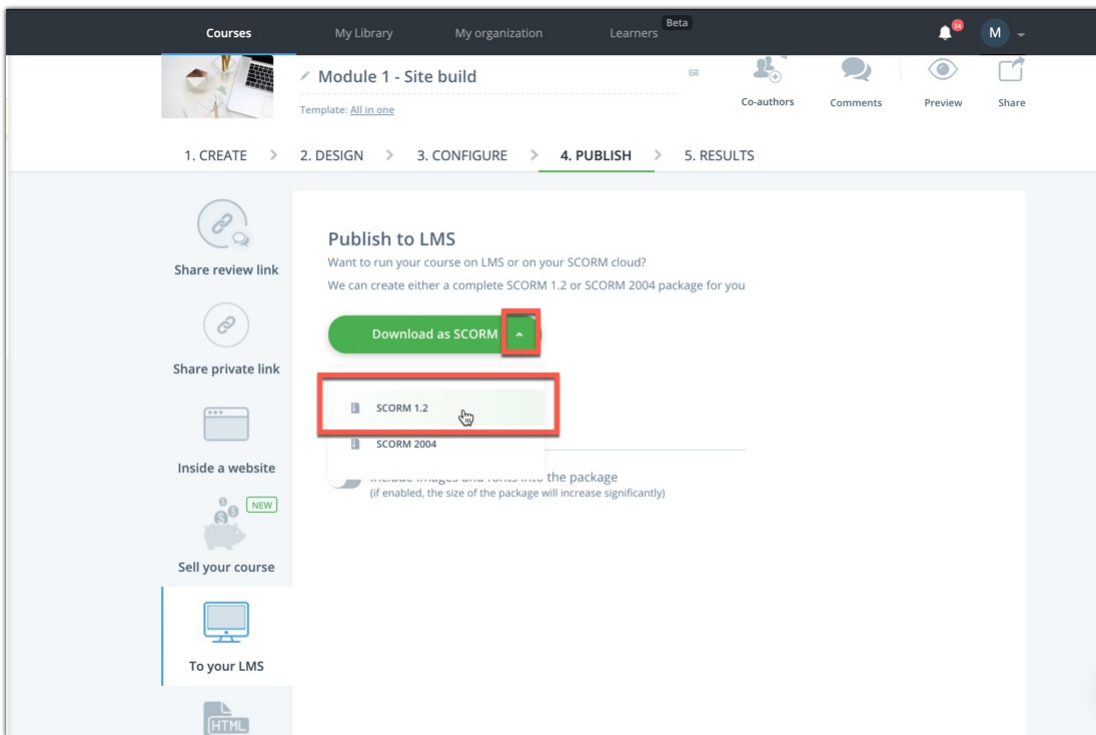

### Choose 'To your LMS'

LMS stands for Learning Management System, Claromentis has an LMS built in where you will add this course:

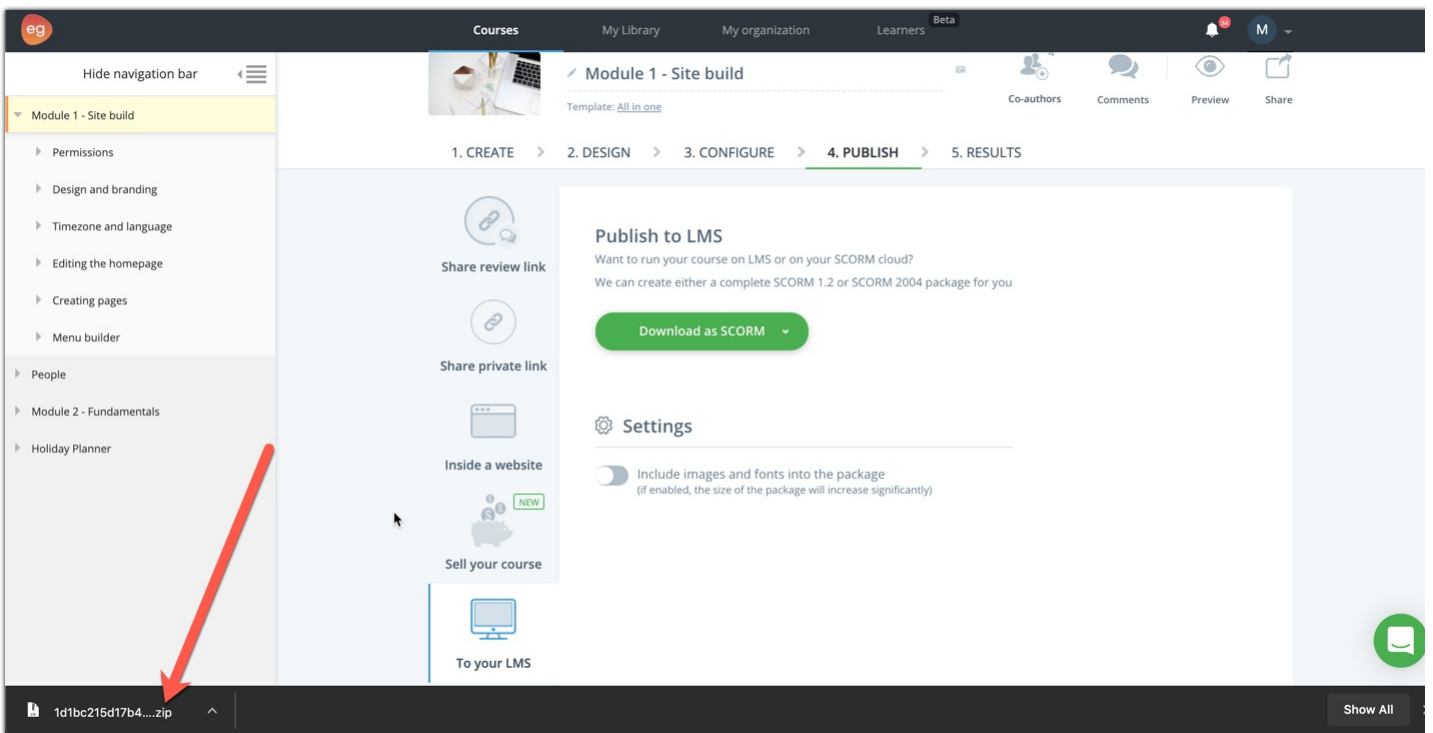

## Download as SCORM

When clicking this button you will have 2 options, for Claromentis, you will need SCORM 1.2:

## File downloads as a zip

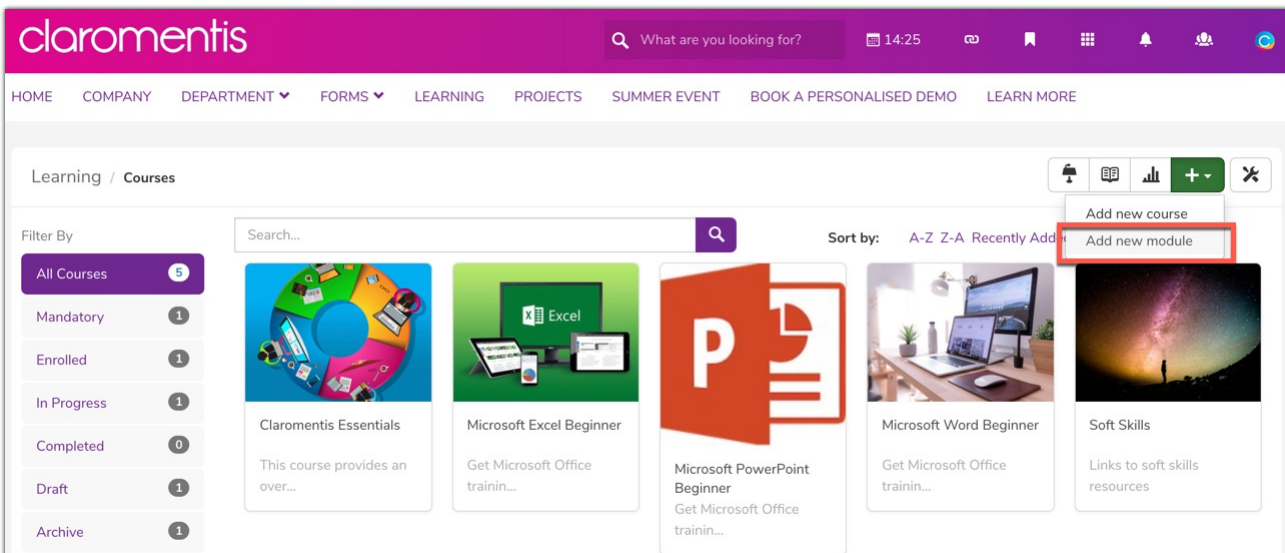

When you click this, the complete file should download as a zip. If you are using a Safari browser it has been known to not provide a zip file, in this instance manually zipping the file will not have the same effect and the file will not work. We recommend downloading the file on another browser where it downloads completely as a zip.

## Uploading SCORM in Claromentis

In Claromentis navigate to

Applications > Learning > E-Learning Courses > Add New Module

When adding new module, please sure you select SCORM 1.2 Package (zip) and upload the zip file.
