

## iOS: Trusting Enterprise Developer

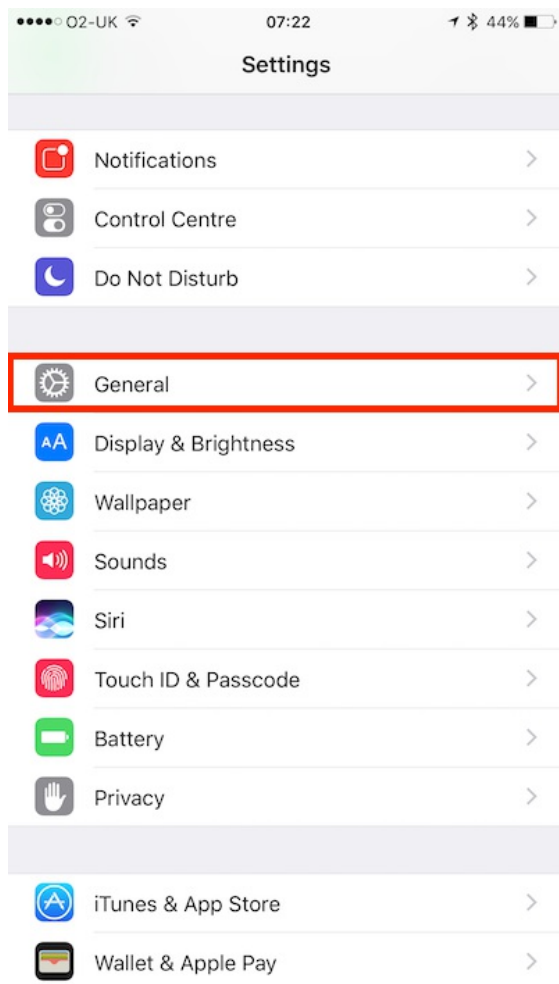

Installing App from [Apple Enterprise Developer Programme](#) requires users to perform the following step on their device to ensure that you trust the app developer and only installing the app from reliable sources.

Find out [why my app can't be published in Public AppStore](#)

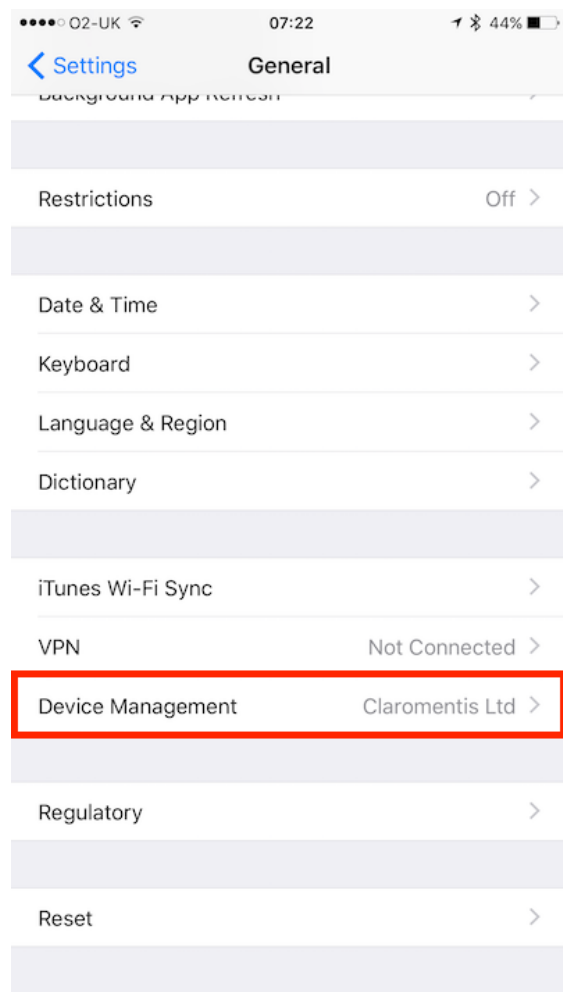

1. On the device, launch the app, and in the “**Untrusted Enterprise Developer**” dialog that appears, click **Cancel**. This step adds Device Management to Settings.

2. Tap **Settings > General > Device Management**.

3. Under Enterprise App, tap the organization name.

4. Tap **Trust “Claromentis Ltd”**. In the dialog that appears, tap **Trust**.

You only need to do this **once** and now you can open the app as normal.
