

# Learning Paths Overview

Archived

Learning Paths are a feature within the LMS allowing you to use its content focused aspects such as Courses, Events and Quizzes, linking them all into targeted syllabi using the qualification code feature.

In order to create a learning path you will need to have been given permissions in the learning paths section:

Admin / Learning

**Learning Path**

Learning Paths

Learning Path administrator has full permission to add / edit / delete all Learning Paths

**Permissions**

Start typing to add... [Browse](#) [Remove](#)

Role: Administrators

[View matching users...](#)

[Save](#)

With this permission set, you will see a button displaying 'create new path' at the top of the learning paths page.

When creating the learning path there will be a series of fields to fill out:

- **Learning Path Title** - The name of the path you wish to create
- **Qualification Code** - The most important factor of linking all items within the LMS though mostly important when

creating steps as seen below. Allows certain items within the LMS to link to one another

- **Description/Abstract** - An overview of the learning path
- **Days to complete** - Setting a deadline to users upon enrolling in the path if they have not completed it after the number of days specified the user will receive a notification for every day after the deadline as a reminder
- **Status** - The current condition of the learning path, whether or not it should be considered live
- **Path Image** - A thumbnail for the learning path
- **Points** - This allows you to define a required pass mark for the learning path. This can't be applied immediately as you need to define points to steps in your path before adding a required pass mark. You will have to revisit this option if you choose to add a pass mark.
- **Permissions** - As per all applications in Claromentis this will allow you to define certain groups of users with varying levels of control within the learning path

**Learning Path Title\***

**Qualification Code\***

**Description/Abstract**  [SOURCE]

**Days To Complete**   
A deadline will effect each user from the day they "Join" this Path.

**Status**  Under Construction  Live  Archived

**Path Image**

**Points (optional)** In order to complete this learning path the user must complete all mandatory material and obtain at least  points out of total {0}

**Permissions**

Can join  
 Edit  
 Delete  
 Manage Participants  
 Receive Admin Notifications  
[View effective permissions...](#)

With the initial details for your learning path added you can press the save button which will take you directly into the learning path you have just created.

Nothing Found

No syllabus has been created for this path yet

As seen in the picture above although the path has been created, there is no content applied to the learning path.

In order to add content, it is required to create a series of Path Steps within the path. This can be done by selecting the Path Steps tab at the top of the screen.

You will also notice a Participants tab which will allow you to add users to the learning path if they do not join independently. (This tab will only appear if you have selected the live status within the learning path details.)

On the Path Steps tab, you will see a list of any existing steps within the main syllabus and the further learning sections of this learning path. You will also see an option to add new steps to the learning path.

Main Syllabus

Step Name	Qualification Code	Points
No result		

Further Learning

Step Name	Qualification Code	Points
No result		

When you choose to add a step to the path you will again be given a series of options similar to the path itself:

- **Step Name** - What the step will be called
- **Description** - A brief explanation of what this step contains
- **Requirement** - This determines if the step has to be completed in order to finish the overall path. 'Mandatory' means this step has to be completed even if the required pass mark is achieved without completing this step, whereas 'non-mandatory' and 'further learning' are considered optional content.
- **Qualification Code** - This allows you to link a piece of learning material to the step. In order to do this, the qualification code given at this point must match the qualification code of an event, course or quiz.
  - *Please note:* You should never have the qualification code of the learning path match with one of the steps, you should also have unique qualifications codes for every step within the learning path.
- **Points** - As mentioned above points are used to enable a pass mark for the learning path allowing

for optional steps in your path

Step Name\*

Description [SOURCE]

Requirement  Mandatory  Non Mandatory  Further Learning

Qualification Code\*

Points

Once the correct information has been applied, press save to create the step within your learning path.  
You can repeat this multiple times to generate a full in-depth path using all the content features of the LMS.
