

How to change overall system fonts using Google Fonts

Overview

Google provides wide range of fonts which can be used to customise your intranet or Digital Workplace. <https://www.google.com/fonts>

How to

1. Get the font collection from Google fonts put them into Collection and follow the implementation guide for **Web usage**

Select the style of font you wish to have, For the purpose of this guide, were selecting **Poppins**

Tips: If you wish to use it for overall system fonts, make sure that you select all styles ranging from Light to Bold, this would allow the system to use a variation of the fonts including Bold and Italic.

2. Under **Use on the web**, choose **link** and copy the code shown.

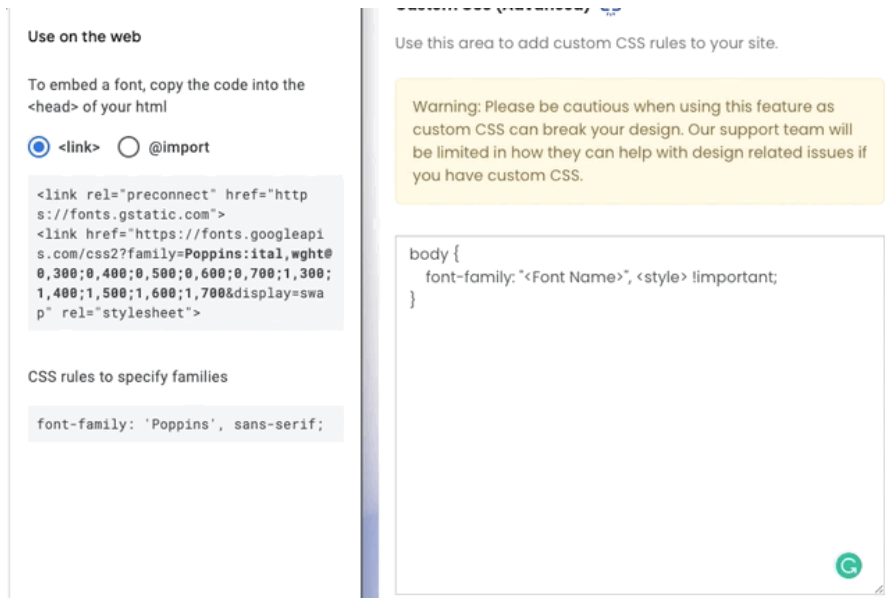

3. In **Claromentis**, navigate to **Admin > Design**

You can either **Edit Master Design** if you wish to use it in all themes or select an applicable theme in which you wish to use this font.

Navigate to the **Edit Style > Advanced** tab

4. Copy and paste the following **CSS** code to the **Custom CSS (Advanced)** field and replace the placeholder text with the name of the font and style.

```
body {  
  font-family: "<Font Name>", <style> !important;  
}
```

5. Under "Use on the Web" in Google Font, paste the Link CSS code into the **Custom Code** field as shown below.

Custom Code 

Copy custom code (for example Google Analytics tracking code) and paste in the text area below.

```
<link rel="preconnect" href="https://fonts.gstatic.com">
<link href="https://fonts.googleapis.com/css2?
family=Poppins:ital,wght@0,100;0,200;0,300;0,400;0,500;
0,600;0,700;1,100;1,200;1,300;1,400;1,500;1,600;1,700&displ
ay=swap" rel="stylesheet">
```

Click **Save**

6. Refresh your page and check the Homepage, make sure that you are using the correct Theme.
