

Courses: Admin overview & Permissions

Application administrators of the [Courses](#) application can access its admin side and follow the information in this guide.

Head to Applications > Admin > Courses to access all the tabs.

Admin permissions

Enter the [users/roles/groups](#) and assign permissions based on what you would like them to be able to do.

In this example, those in the administrator People role can do everything, and so can those in the group. This ensures the group can manage the upkeep day to day, but administrators have the same access in case assistance is needed.

A screenshot of the 'Admin Permissions' configuration page in the Courses application. The page is titled 'Admin > Courses (e-learning) > Admin Permissions'. On the left, there is a sidebar with navigation options: 'Admin Permissions', 'Course Permissions', 'Module Permissions', 'Manage Categories', and 'Preferences'. The main content area shows the 'Admin Permissions' configuration for the 'Learning and Development' group. It includes a search bar with 'Start typing to add...', a 'Browse' button, and a 'Remove' button. Below the search bar, there is a list of permissions with checkboxes: 'Add Course', 'Add Module', 'View Reports from own group(s)', 'View all reports', 'View Archive', 'Manage Module completions', 'Delete Course', and 'Delete Module'. All checkboxes are checked. There is also a link to 'View effective permissions...' and an 'Apply permissions' button.

- **Add Course:** Can [create new Courses](#)
- **Add Module:** Can [create new Modules](#)
- **View Reports from own group(s):** Can [view reports](#) belonging to their own People group
- **View all reports:** Can [view reports](#) containing course records of all users
- **View Archive:** User(s) can view and manage archived courses
- **Manage Module completion:** The ability to mark modules as complete on behalf of other users (should only be given to administrators)
- **Delete Course:** Can delete any course
- **Delete module:** Can delete any module

Course Permissions

This area acts as the default permissions that will pull through to [new Courses created](#).

They can be further edited at that point, but enter [users/roles/groups](#) here that are generic and likely to be repeated in Courses to speed up this process when creating new ones.

It is fine to leave this area blank if you do not think it would be of benefit to your team; they can fill out the permissions every time a new course is created.

Admin > Courses (e-learning) > **Course Permissions**

Course Permissions

Configure default course permissions during course creation. Individual course permissions can be customised later.

Start typing to add...

All registered
Role: Administrators

- Can Enrol
- Mandatory to Enrol
- View Audit
- Receive Notification upon Course Completion
- Review Draft
- Edit
- Delete

[View effective permissions...](#)

Admin > Courses (e-learning) > **Course Permissions**

Course Permissions

Configure default course permissions during course creation. Individual course permissions can be customised later.

Start typing to add...

All registered
Role: Administrators

- Can Enrol
- Mandatory to Enrol
- View Audit
- Receive Notification upon Course Completion
- Review Draft
- Edit
- Delete

[View effective permissions...](#)

- **Can Enrol:** Can join the Course and take its content
- **Mandatory to Enrol:** Once a user enrols, they cannot unenrol from the course
- **View Audit:** Can view the audit tab containing course data (i.e. user names, enrollment & completion dates, and completion status)
- **Receive Notification upon Course Completion:** Will receive a notification when the course is completed by any user - for this reason, this permission is usually only given to administrator roles/groups
- **Review Draft:** User(s) can access and review courses in Draft status
- **Edit:** User(s) can edit any existing course content and details
- **Delete:** User(s) can delete any existing course

Module Permissions

This area acts as the default permissions that will pull through to [new Modules created](#).

They can be further edited at that point, but enter [users/roles/groups](#) here that are generic and likely to be repeated in Modules to speed up this process when creating new ones.

It is fine to leave this area blank if you do not think it would be of benefit to your team; they can fill out the permissions every time a new module is created.

- **View Only:** Can open and view module content
- **Can Complete:** This option means a checkbox will appear in the module, allowing the user to mark it as completed (Best to give on the front end for content that is not SCORM to mark completion)
- **Review Draft:** Can access and review modules in Draft status
- **View Statistics:** Can view module statistics containing user data
- **Edit:** Can edit any existing module
- **Delete:** Can delete any existing module

Manage Categories

Add or edit categories under which courses can be created.

There are no permissions tied to these; they are simply labels to allow users to categorise content on the front end.
