

## Course and Module Validity Reminders

---

### Overview

In the Learning application, both Courses and Modules have configurable validity dates meaning that upon completion they will have to be re-taken in X amount of months/years.

This guide will cover how to set a validity date within a course and/or module as well as how to set up reminder emails to ensure users can keep track of their progress.

---

### Course validity

Course validity refers to how long the course will be valid before the user(s) are required to re-take the course.

When the Course validity check is performed the system is looking to see if users have completed all modules within the Course and if they have then they are automatically completed for the Course once again.

Therefore if you are going to be using a Course validity, you should also set validity on the modules within that Course, to ensure they also expire.

Without module validities set as well when your Course expires the modules won't (so users remain 'completed' for modules) and the system will mark users as complete for the Course, which may not be your intention if you wish users to instead re-take the content.

1. Head to the Course you would like to set a validity date.

2. Select **Edit Properties**.

## Claromentis Test

5. Once you have completed filling out the necessary information, press

**Please note:** When the validity date is reached, user completion status will automatically change from **Completed** > **Enrolled**

| Name          | Mandatory                | Date Enrolled    | Date completed   | Status           |
|---------------|--------------------------|------------------|------------------|------------------|
| Phil Lawrence | <input type="checkbox"/> | 06-07-2020 14:05 | 26-07-2021 20:55 | <b>Completed</b> |
| Abigail Clark | <input type="checkbox"/> | 06-07-2020 14:05 | N/A              | <b>Enrolled</b>  |
| Julia Greene  | <input type="checkbox"/> | 13-07-2020 14:10 | 15-07-2020 09:29 | <b>Enrolled</b>  |
| Austin Glover | <input type="checkbox"/> | 27-07-2020 13:25 | 28-07-2020 16:11 | <b>Enrolled</b>  |

## Course reminders

Once the Course Validity date has been set, a reminder notification will be triggered after X months/years after the last completion date.

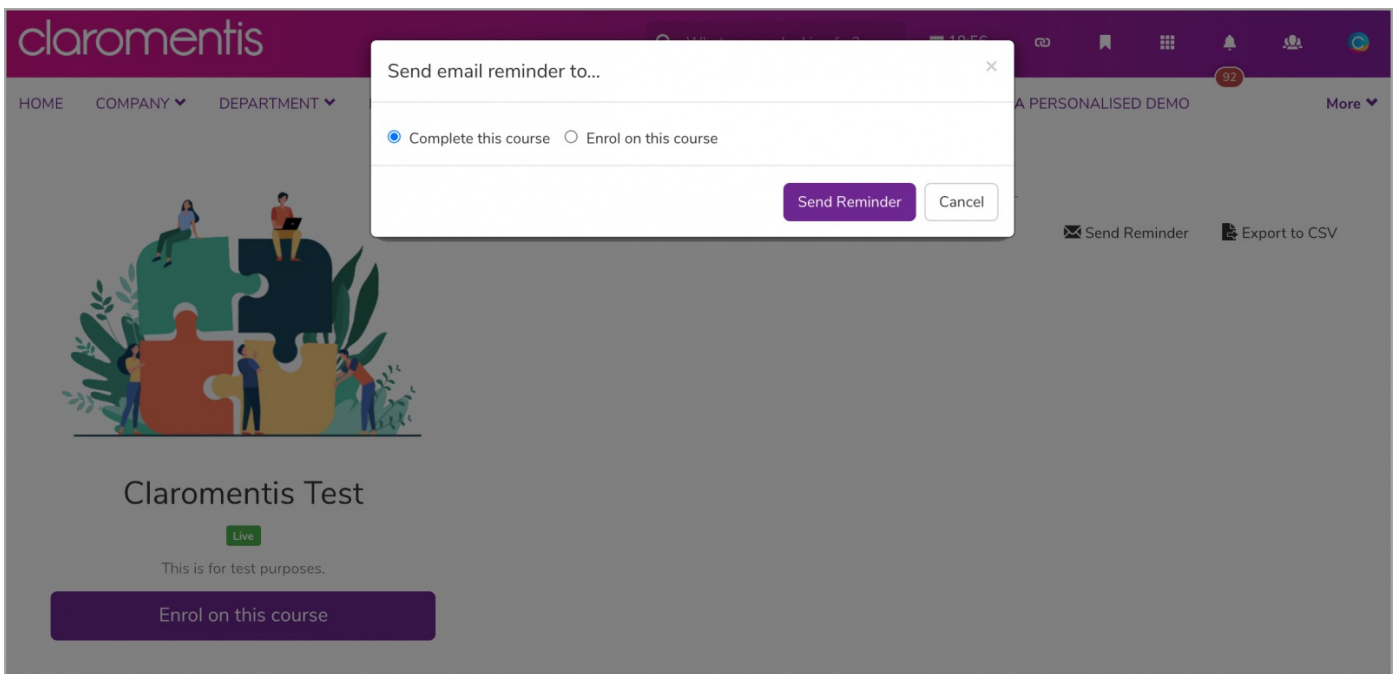

**Please note:** A reminder for users to re-take a course will be triggered daily until completed.

## Additional course reminders

There is also an option to manually send a one-time-only notification email reminder via the **Audit** section found on the landing page of the course.

The screenshot shows the course landing page for 'Claromentis Test'. The breadcrumb navigation is 'Learning / Courses / Claromentis Test'. The page features a large illustration of people working together on puzzle pieces. Below the illustration, the course title 'Claromentis Test' is displayed with a 'Live' badge and the text 'This is for test purposes.' and an 'Enrol on this course' button. In the top right corner, there are icons for notifications, a book, a bar chart, a plus-minus sign, and a close icon. Below these icons, there are tabs for 'Modules', 'Manage modules', and 'Audit'. The 'Audit' tab is selected, and a red arrow points to the 'Send Reminder' and 'Export to CSV' buttons.

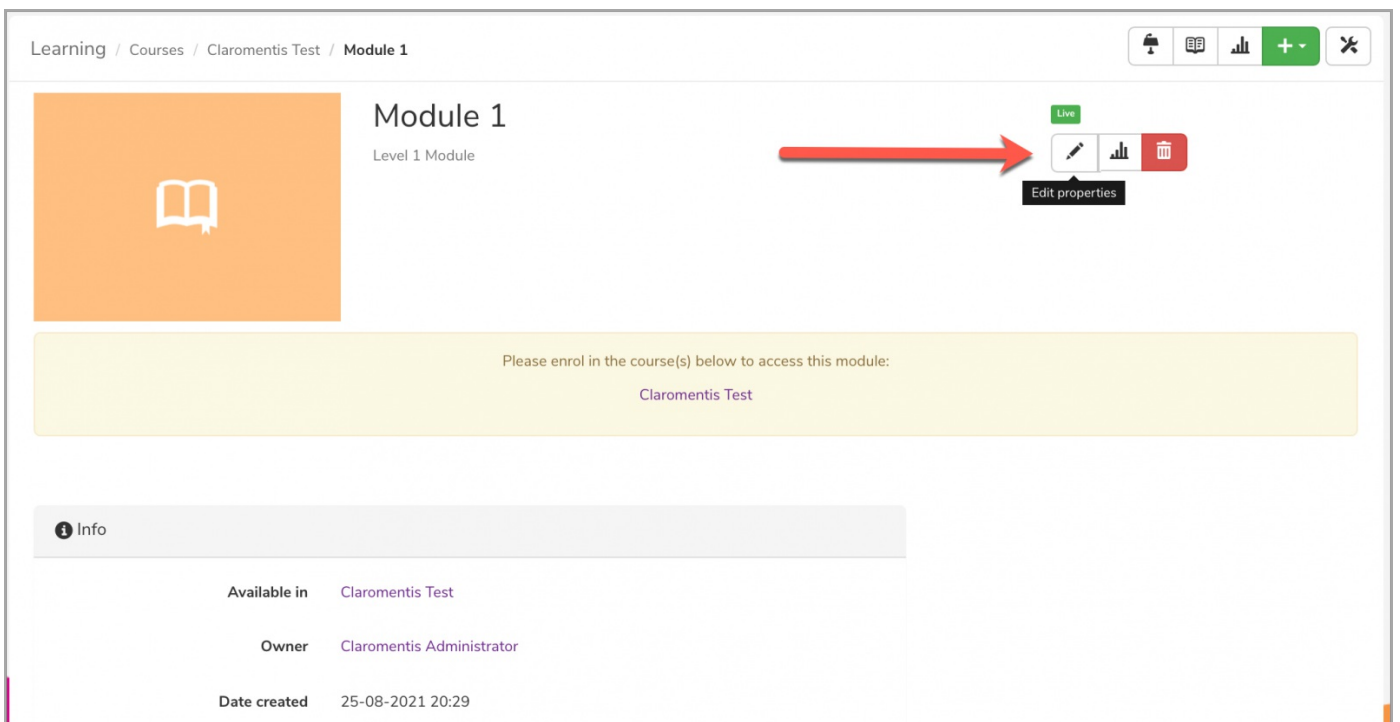

Here you can choose to remind users to (a) Complete the course or (b) Enroll in the course.

## Module validity

Module validity refers to how long the module will be valid for before user(s) are required to re-take the module.

1. Head to the Module you would like to set a validity date.
2. Select **Edit Properties**.

3. Navigate to the **Advanced** tab.
4. Enter the **Module Validity** timeframe either in Month(s) or Year(s).
