

## Custom Reports

### Introduction

In the Reports application, you can create your own custom reports. This article will provide an overview of how you can build and save a custom report for the following applications - Projects, Policy Manager, Courses, Learning, Quiz.

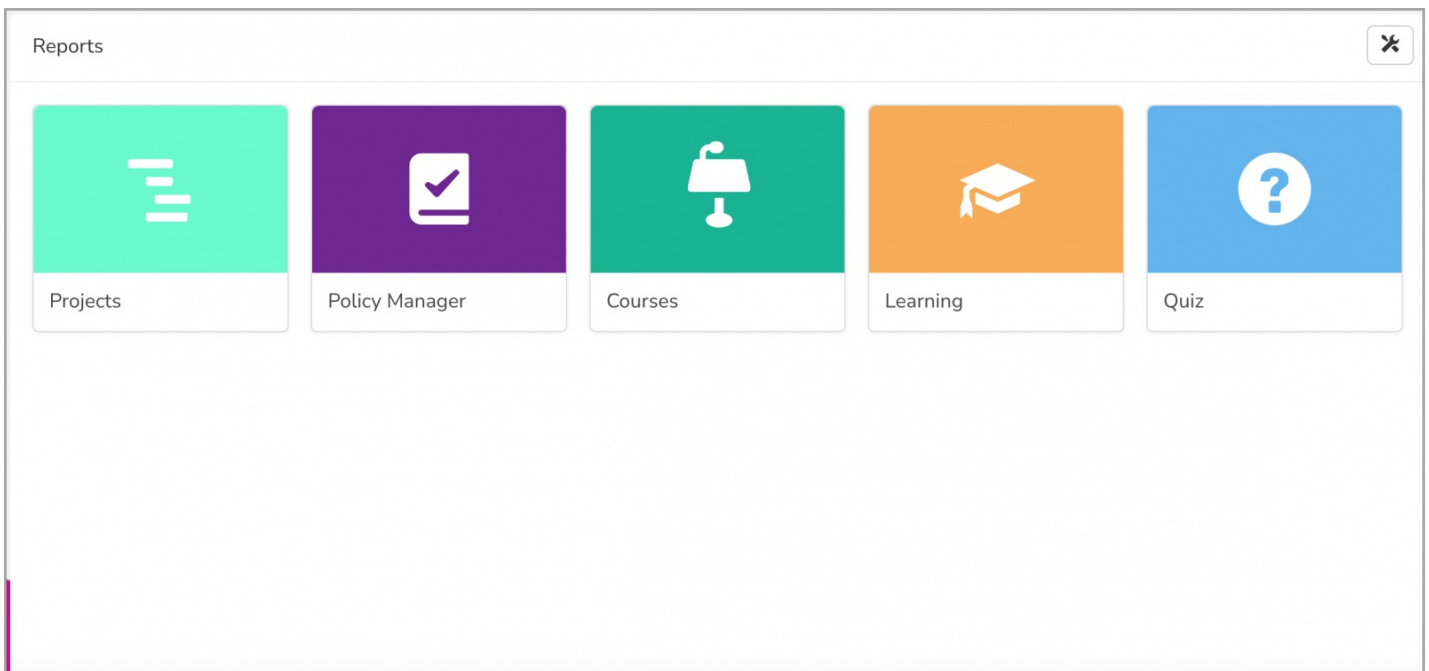

We will cover the following areas:

- [Accessing the reports tool](#)
- [Adding custom reports](#)
- [Building custom reports](#)
- [Report columns](#)
- [Saving custom reports](#)

**Please note:** Admin permissions will need to be granted in order to access the Reports application. For more information, please check out our guide [here](#).

### Accessing the reports tool

Head to **Application > Reports** and select the application you wish to create a report on.

### Adding custom reports

On the landing page, you will be presented with a list of all existing reports. With the correct permissions, you will also see the option to

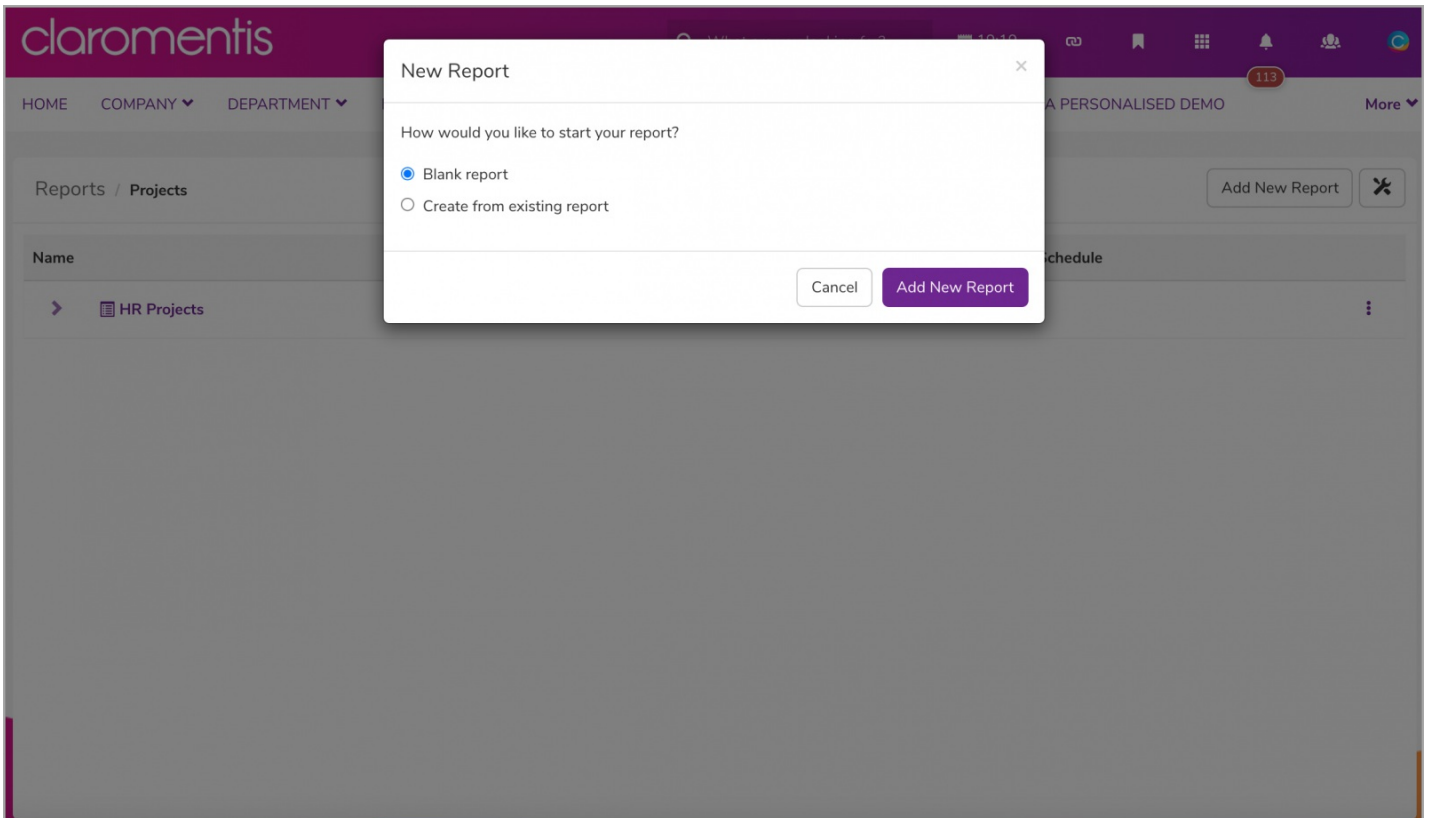

Add New Report

Reports / Projects  Add New Report 

Name	Owner	Last Modified	Next Schedule
 HR Projects	Claromentis Administrator	26 Apr 2021, 15:56	

**Reminder:** If you do not see the option to create a new report, please check with your administrator that you have the permission needed to do so.

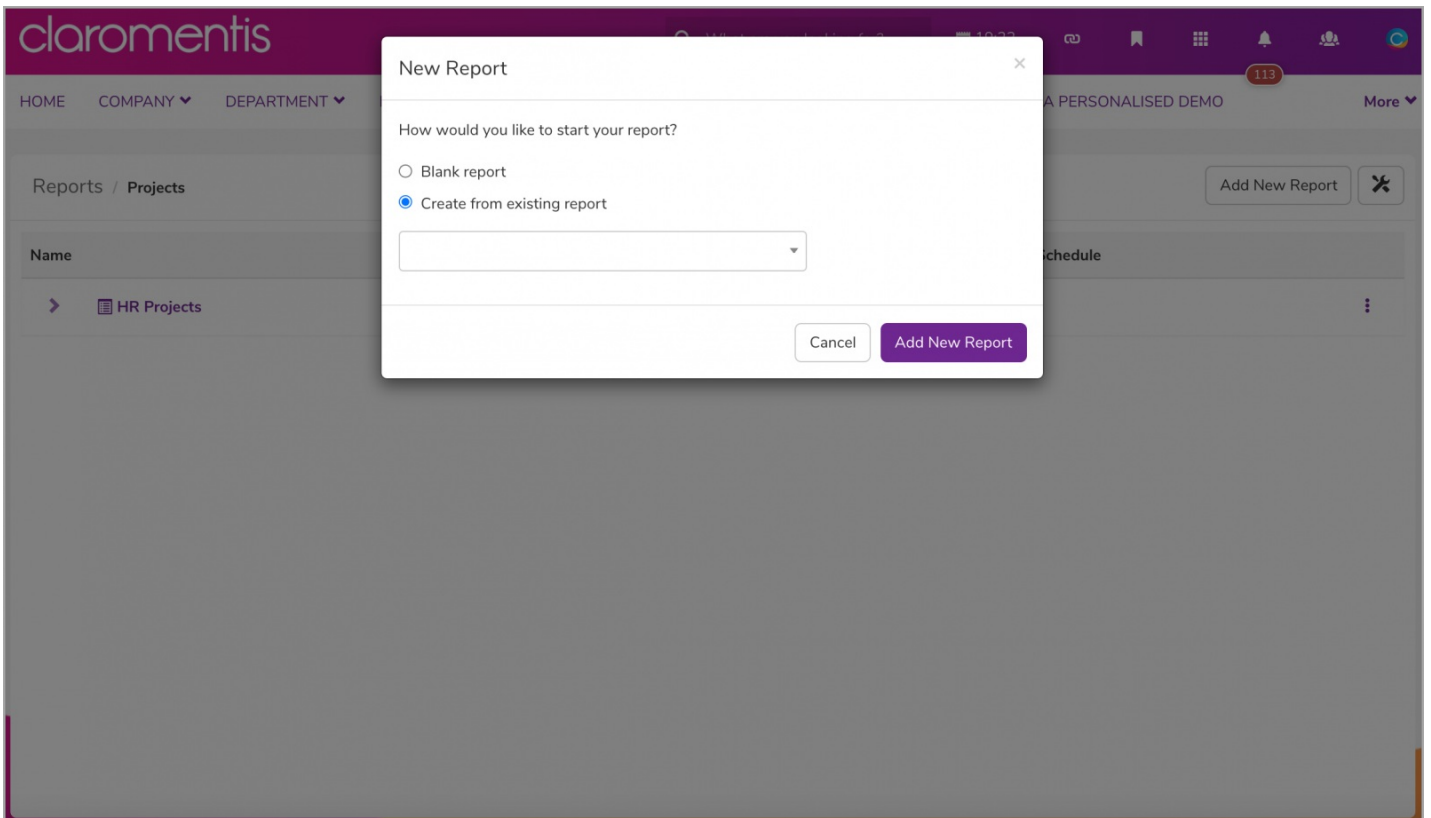

You can choose to (1) create a new report from scratch or (2) copy from an existing one.

The screenshot shows the 'New Report' dialog box overlaid on the 'Reports / Projects' page. The dialog box contains the following text and options:

- Title: New Report
- Question: How would you like to start your report?
- Options:
  - Blank report
  - Create from existing report
- Buttons: Cancel, Add New Report

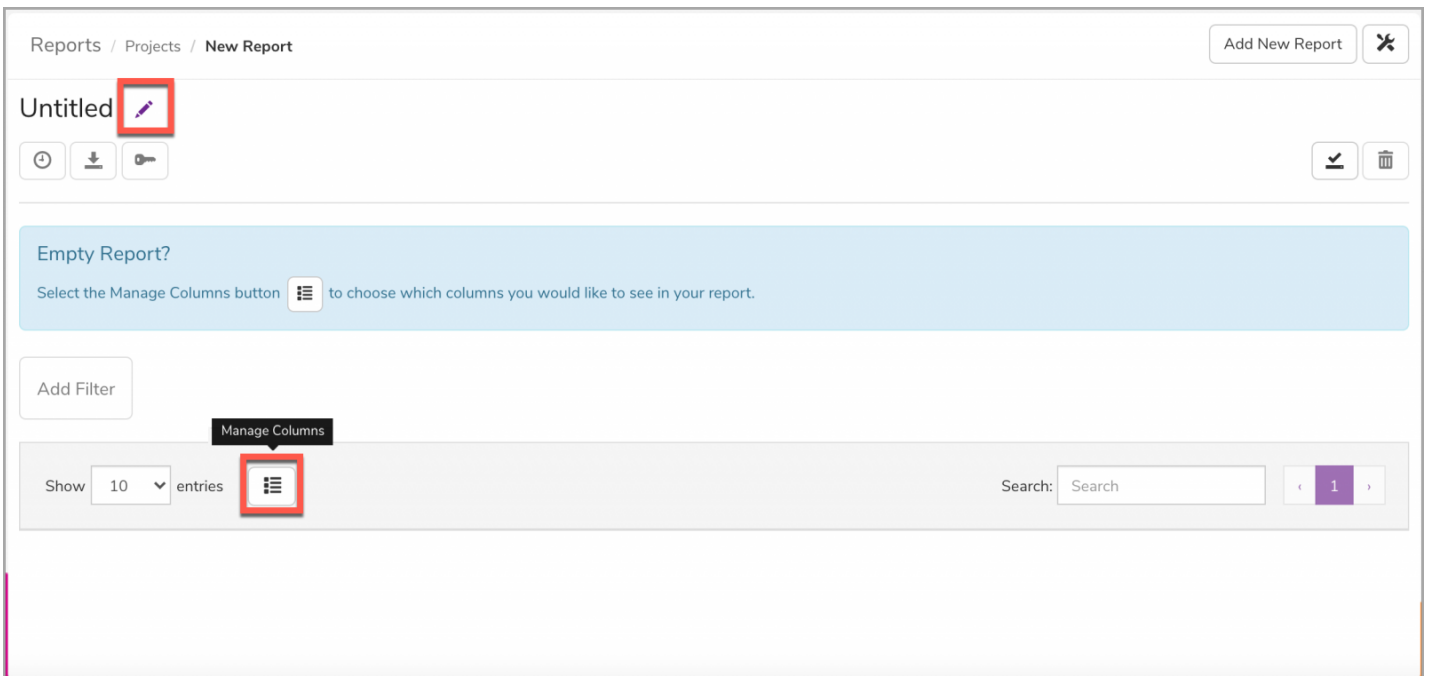

To create from an existing report, simply select which report you would like to copy from.

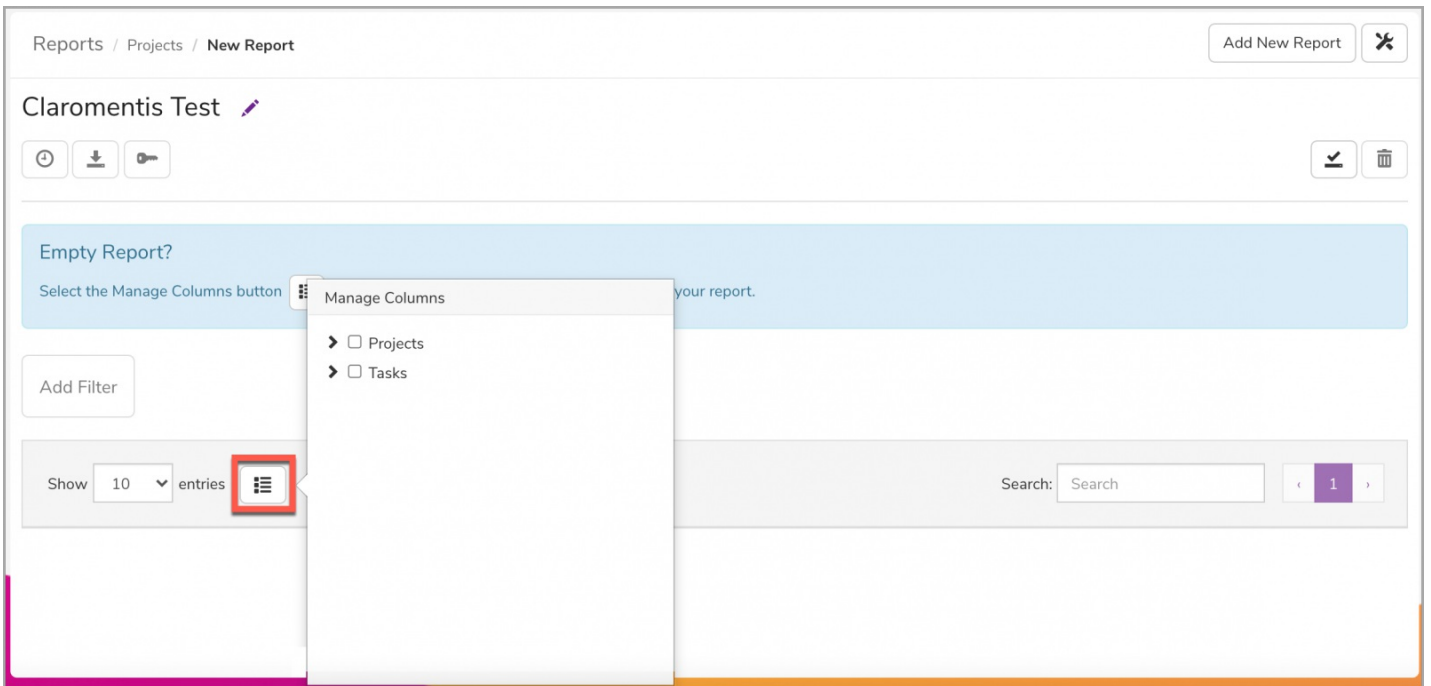

Once the option has been selected, you can begin building the report by clicking [Add New Report](#)

## Building custom reports

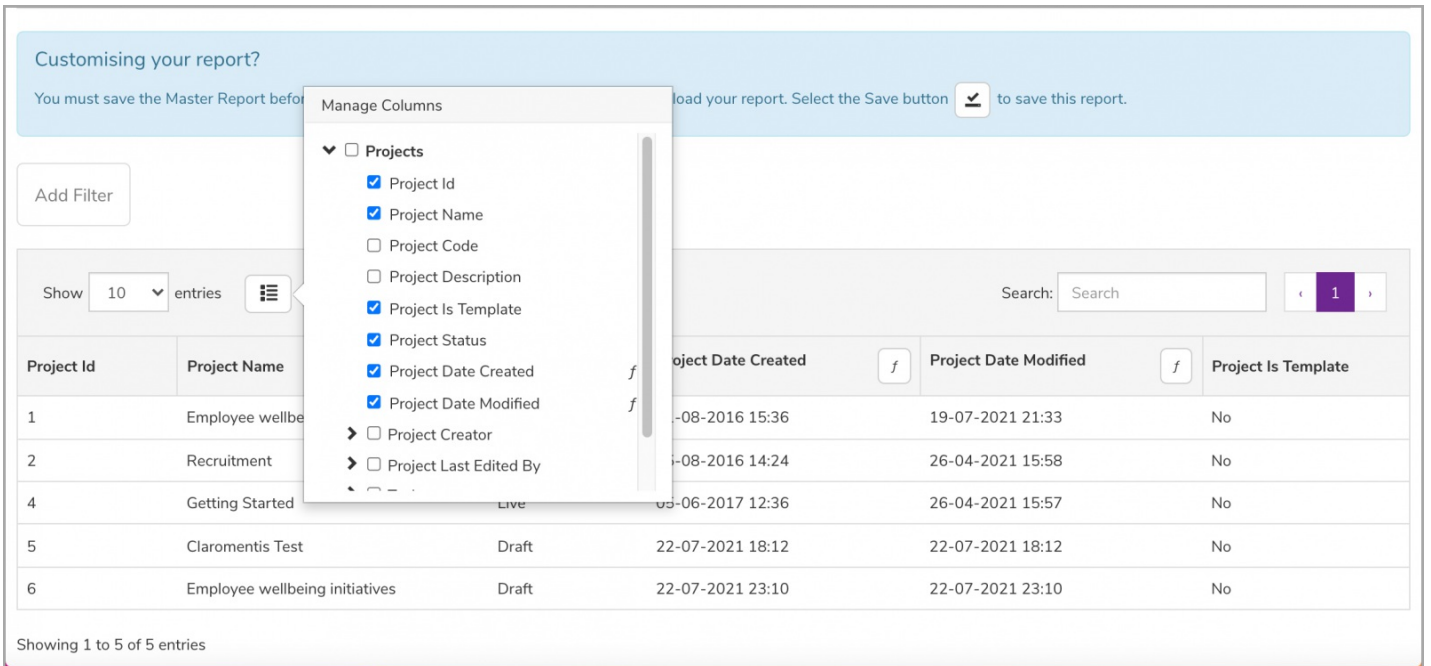

To start, you will be required to define the custom report (1) Title and (2) Manage Columns.

The **Manage Columns** option will display all available columns you can add.

Use the drop-down arrow to view nested columns and tick the columns you want to add.

Each column will be added in the order they are selected. Use the drag & drop feature (on column titles) to re-order columns as needed.

**Please note:** The maximum number of columns selectable is 64

## Column elements

Each application has different columns to select from.
