

Metadata overview

Introduction

Access the Metadata application by heading to **Applications > Admin > Metadata**.

Metadata can be used to provide additional information and/or supporting information about content that exists on your intranet. You can manage and create new metadata according to the needs of the intranet as an application administrator.

Metadata for the following applications will be covered in this guide:

- [Gallery application](#)
- [News application](#)
- [People application](#)
- [Discuss application](#)
- [Learning application](#)
- [Projects application](#)

For more information on Documents metadata, head to our article [here](#).

Managing metadata sets

Under **Misc metadata**, you can select any of the available applications to view, edit, and manage existing metadata.

Admin / Metadata

New metadata set

Name	Type
Common metadata heap	Common metadata heap
Image Gallery	Image Gallery
News	News
Users	Users
Idea Spaces	Discuss
Training Record	Training Record
Projects	Project

Name	Type
Documents	Documents
Folders	Folders
Markers	Markers

Audit

Name	Type
No metadata sets	

A new metadata set can also be added by selecting [New metadata set](#)

Admin / Metadata

[New metadata set](#)

Misc metadata

Name	Type
Common metadata heap	Common metadata heap
Image Gallery	Image Gallery
Image Gallery	Image Gallery
News	News
Users	Users

Training Record	Training Record
Projects	Project

Documents metadata

Name	Type
Documents	Documents
Folders	Folders
Markers	Markers

Audit

Name	Type
No metadata sets	

By doing so, 'Metadata set type' for other applications including the Knowledge Base & Courses application can be created and named as desired.

Admin / Metadata / New metadata set

Metadata for: New set

Metadata set type: Knowledgebase Article ▾

Metadata set name:

Creating metadata

When accessing a metadata set, the metadata field(s) will be displayed for each application.

New metadata for each application can be created by using [Create new field](#)

Admin / Metadata / Edit metadata set

Metadata for: Common metadata heap

Metadata set name:

Key / Order #	Title	Type	Default value	Editable	Repeatable
No metadata fields					

[Create new field](#)

The following information can be configured.

Admin / Metadata / Edit metadata set / New metadata field

1 Title

2 Key

This Key is the metadata field's internal name used in searching and user import.
Key should contain only letters, numbers and "_"

3 Type

4 Show as

5 Default value

6

Editable by users

Repeatable

Can be inherited from parent

Visible

Visible even if no value

Mandatory

1. **Title:** The title of the metadata field
2. **Key:** The internal name of the metadata field used in searching and user import. The Key should contain only letters, numbers and underscores
3. **Type:** The field type used for the metadata field
4. **Show as:** The appearance of the field e.g. a text box
5. **Default value:** Information that can autofill the field without interaction from the user
6. **Optional settings:** Additional settings that can be configured if appropriate for the metadata

Optional settings

- **Editable by users:** Users will be able to view & edit the information entered in the metadata field.
- **Repeatable:** The option to add an extra field of the same configuration will be available. Up to 5 maximum can be added for most field types.
- **Can be inherited from a parent:** The option for sub-metadata items to inherit parent metadata items. This option is mostly intended for the Document application.
- **Visible:** The metadata field will appear in the areas chosen if the field has information entered.
- **Visible even if no value:** The metadata field will appear in the areas chosen even if the field has no information entered.
- **Mandatory:** The metadata field will be required to have information entered and will be marked by a red asterisk.

Metadata can be edited by selecting the 'pencil' icon or deleted by selecting the 'detach' icon.

The order of the metadata can also be changed by using the drag & drop feature, if applicable.

Admin / Metadata / Edit metadata set

Metadata for: News

Metadata set name:

Key / Order #	Title	Type	Default value	Editable	Repeatable	
news_source	Source	Hyperlink		✓		 

Please note: Any default metadata will not appear here as it is hardcoded and cannot be changed.

Misc metadata

Each application has different metadata to select from.

Image Gallery metadata

Image Gallery metadata is metadata attached to the images & albums in the Gallery application.

Admin / Metadata / Edit metadata set

Metadata for: Image Gallery

Metadata set name: Save Delete this set Export

Key / Order #	Title	Type	Default value	Editable	Repeatable	
image_description	Image Description	String		✓		

Create new field

Metadata can be found by heading to the Gallery album properties. You can select 'Metadata Options' to add the metadata field you wish to display in the album images.

Image Gallery / Edit album ★ My favourites ✕
