

Add Custom Application Links

Overview

In addition to built-in Claromentis apps, you may wish to customise or add external web apps to the application menu.

Custom menu items to external apps can be added easily by following these steps.

1. Navigate to Admin > Menu Builder > Applications

This screenshot shows the 'Applications' section of the Menu Builder. It has a sidebar with 'Menu list' and 'Company Links'. Under 'Applications', there's a list with 'Announcements' and 'Badges'. A red box highlights the 'Applications' link in the sidebar. At the top right, there are 'Add new link' and 'Add divider' buttons.

2. Adding a custom app

Click on Add new link to add a custom app, below is an example for Google Drive

This screenshot shows the 'Update link' dialog. It has fields for 'Title' (Google Drive), 'Link' (https://drive.google.com), and 'CSS class' (glyphicon-google-drive). Below the fields are two checkboxes: 'Open in new tab' (checked) and 'Visible' (checked). At the bottom are 'Save changes' and 'Cancel' buttons.

Title: Google Drive

Link: <https://drive.google.com>

CSS class: glyphicon-google-drive

You can find a suitable icons by using Glyphicons Finder which is located under [Admin > Labs > Design > Glyphicons Finder](#)

Check open in a new tab (Recommended for external apps)

Check visible.

Don't forget to **Save changes**.

FAQs

Can I upload my own image to use as an app menu?

Currently, it is not possible, Claromentis uses components called Glyphicons to provide iconography for the app menu because it is designed similar to the fonts which can scale up and down without the need to upload different image sizes depending on the needs.
