

27001 - Incident Report

[Download](#)

Overview

An extensive form which captures much information relevant to an incident. Incidents are specifically related to data loss and data protection.

Additional features

- Allows quick reporting by anyone with permissions
- Then ensures that the person responsible completes the rest of the information connected with the reported incident
- There is a process flow which manages status changes and assignments to the individuals responsible for resolving the incident
- Notifications
- Linked to a lessons learnt process

How to edit existing forms

For more information on editing sections within an infocapture form please take a look through our [beginner guides](#) and [this useful article](#) to help guide you.
