

Cookies

Claromentis uses cookies to help with user experiences such as remembering preferences and sessions. Here is a list of cookies and local storage variables used within the product and for what's purpose.

<i>Cookies</i>	<i>Purpose</i>
PHPSESSID	Preserves user session in the system.
claromentis_autologon	Autologin token.
twofa_device	Unique device fingerprint to remember multi-factor authentication device.
G_ENABLED_IDPS	Google Identity Provider, used for Sign in with Google
CKFinder_Path	Remember the last use path when browsing assets from a rich text editor.
CKFinder_Settings	Settings and preferences for a rich text editor.
calendar-sort	Used to sort data in the calendar application.
Claromentis Data Store>docs_folder_id	Saving the last folder id viewed in documents for the current browser. It is so that when a user returns to documents they will still be in the same folder they were previously.
pdf_supported	Storing preference related to viewing PDF in documents.

This is not a complete list as depending on the application used and third-party provider, additional cookies will be stored.
