

Blog Notifications

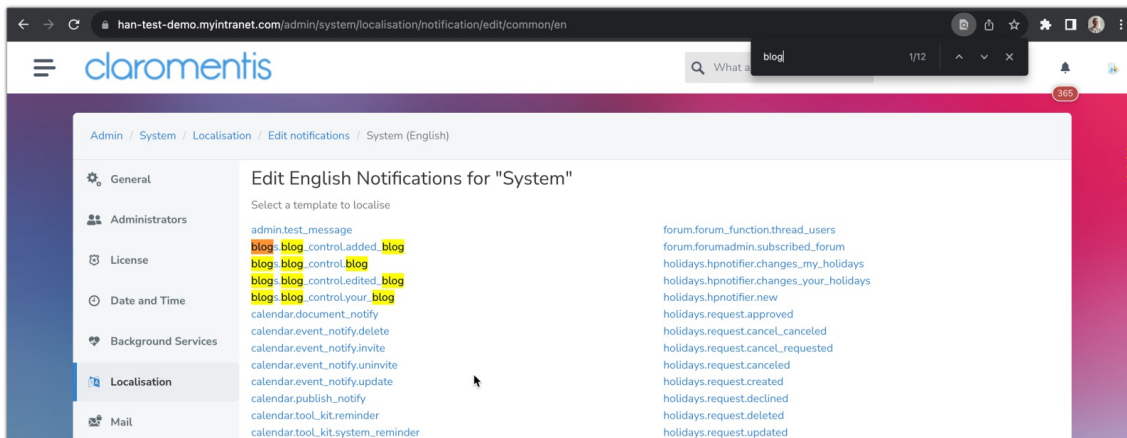

Archived

We will provide an overview of available Blog notifications.

Notifications are attached to Blog permissions. Users will only receive notifications if they have permission to view the blog channel.

To find out more, check out our guide on [Blog permissions](#).

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > System**.

Notification not sending?

Remember: The type of notification received by users e.g. email, in-system, none etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are correct to receive this how they would expect.

What notifications can Blog send and who will receive these?

blogs.blog_control.added_blog.twig

This notification will fire when a new blog post has been submitted for approval (by a user who does not have 'Publish' rights) and the recipient will be the users with the 'Approve Others' permission.

On Prosperity
A new blog post was added by John Smith.
[Approve/Decline this blog post](#)

blogs.blog_control.blog.twig

This notification will fire when a new blog post has been published to a channel and the recipient is [subscribed](#) to the channel.

If a user is not subscribed, they will not receive this notification when new posts are added even if they can 'View' the channel.
