

Event notifications

We will provide an overview of all available Event notifications.

Notifications are attached to Event permissions, so users will only receive notifications if they can join or withdraw from an Event or its waiting list.

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > Events**.

Admin / System / Localisation / Edit notifications / Events (English)

Edit English Notifications for "Events"

Select a template to localise

events.admin.user_joined	events.user.declined
events.admin.user_requested	events.user.invited
events.organiser.status_updated	events.user.manager_added
events.organiser.user_withdrew	events.user.manager_removed
events.user.approved	events.user.now_waiting
events.user.attending	events.user.updated
events.user.cancelled	events.user.withdrawn
events.user.capacity_increased	

Notification not sending?

Remember: The type of notification received by users e.g. email, in-system, none etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check the recipient's preferences are correct to receive this how they would expect first.

What notifications can Events send and who will receive these?

1. Basic user Event notifications

These notifications [will always be received in email format](#) and not in line with user preferences

events.user.invited

events.user.cancelled

events.user.updated

These 3 notifications are configured by the user who created the Event and can be enabled using the option below, which appears when creating one:

Permissions

Start typing to add... Browse Remove

All registered
Role: Administrators
Group: Marketing

[View effective permissions...](#)

Status

Live

Display this Event at the top of the Upcoming Events list
 Send an email invitation/cancellation/updates to users who can sign-up

Submit Cancel

These notifications will only be sent to users with 'Can join' permissions and will fire in these scenarios.

- **Invited:** The Event has been made live
- **Cancelled:** The Event is cancelled by the creator of the Event or an Administrator
- **Updated:** The Event is edited and saved (usually as an update is required e.g. the the date/time, title etc)

2. If approval is required to join the Event

Approval

Approval required to attend
 Attendee's line manager/supervisor can also approve

events.admin.user_requested

This fires when a user with permission requests to join an Event as this requires approval.

The recipient(s) will be users who have been given the 'Manage booking and attendees' permission.

They can either approve or decline the request, which means the user can be added or left out of the Event.

It's possible to widen the number of users who can make approvals to the user's line manager, as designated in Admin > People, it can be enabled per Event using the option below:

Approval

Approval required to attend
 Attendee's line manager/supervisor can also approve

events.user.approved

events.user.declined

The user who requested to join an Event that requires approval will receive either of the above notifications based on the choice made by the user with 'Manage booking and attendees' permission (which could include their line manager if that option has been enabled) about their request to join.

Events > Event details > Attendee Registration

test event
0 users are joining this event, including 0 friends/family

Select a User, Group, Role or Extranet

User	Job title	Email	Approve / Decline	Notes	Date / Time		Attended
Jennifer Langdon	Trainer	jennifer@claromentis.net	<input checked="" type="checkbox"/> Approved <input type="checkbox"/> Declined		25-09-2025 08:49	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/>

Please note: If a user has declined approval, they will not be able to request approval again; 'Declined' will appear where the join button usually appears, preventing them from doing so.

If in the future it is decided the declined user does need to join the Event, then a user with 'manage booking and attendees' permission, administrator or their manager (if enabled) can change their status in the 'attendee registration' area, or use the bin icon to remove them completely (allowing them to request approval to join again)

Free spaces will need to be available in the Event to approve them.

test event

🕒 Thursday, 25 September, 09:00 - 09:30

This event is organised by
[Claromentis Administrator](#)

test

Declined.

Who's Going

There are no participants at present

3. If the Event has a limited number of spaces

Participants Limited Unlimited

Total capacity people

Allow each user to bring up to friends or family

Allow waiting list up to people

Private (Participants will not be displayed)

events.admin.user_joined

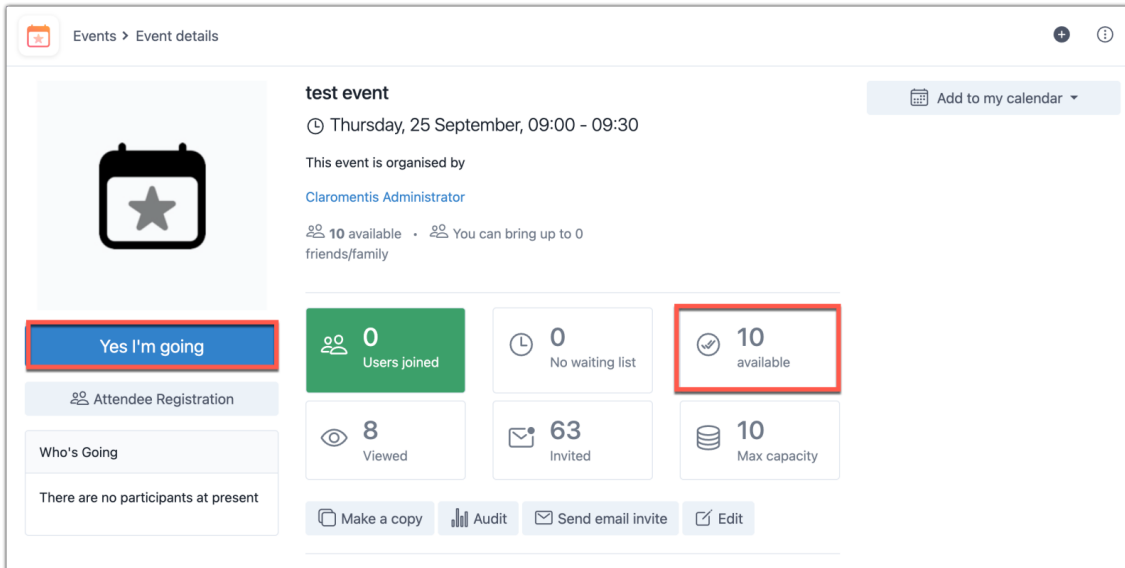

This notification will fire when a user has clicked to attend an Event when there are spaces available.

It will be sent to users with the 'Manage booking and attendees' permission.

events.user.attending

This notification will fire when a user has clicked to attend an Event when there are spaces available.

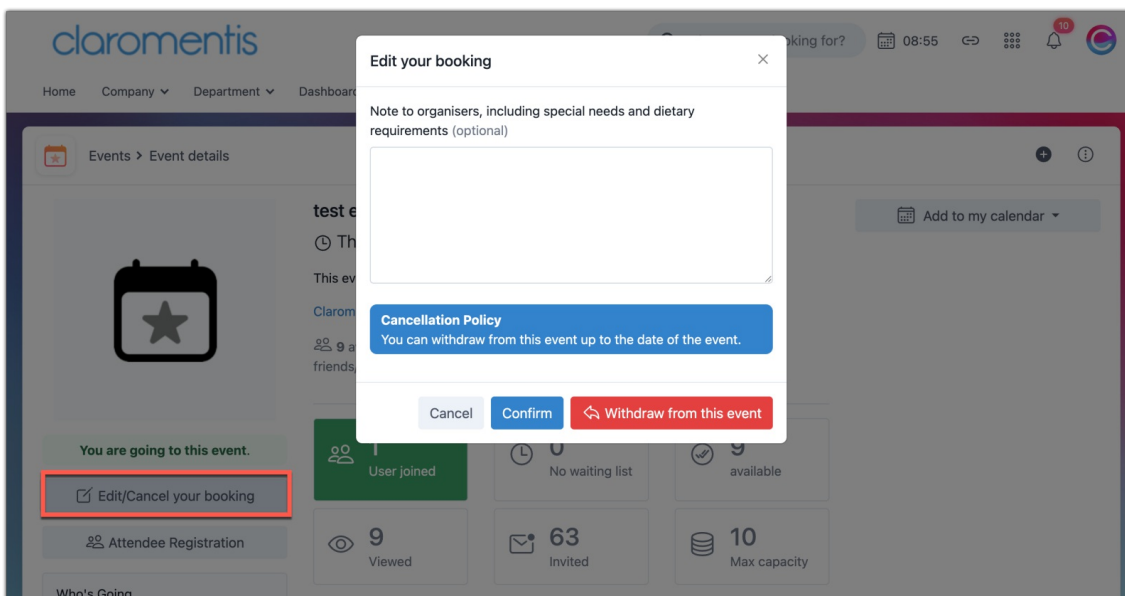

It will be sent to the user who clicked to attend ('Yes I'm going') to confirm they have joined.

events.organiser.user_withdraw

This notification will fire when a user who joined the Event has withdrawn from it.

It will be sent to the user with the 'Manage booking and attendees' permission.

4. If the Event implements a waiting list

(This can only be configured when Event spaces are limited).

Participants Limited Unlimited

Total capacity people

Allow each user to bring up to friends or family

Allow waiting list up to people

Private (Participants will not be displayed)

events.user.now_waiting

This notification will fire when a user previously attending the Event has withdrawn and a waiting list has been implemented.

It will be sent to all users on the waiting list and will outline their new position in the queue due to the withdrawal.

Please note: Every time a user withdraws from an Event those on the waiting list for it will receive this notification outlining their new position in the queue.

events.user.withdrawn

This notification will fire when a user previously attending the Event has withdrawn and a waiting list has been implemented.

It will be sent to the user in the first position on the waiting list advising they are no longer on the waiting list and have now been added to the Event as attending.

events.user.capacity.increased

This notification will fire when the total capacity of the Event has been raised by the Event creator or user with permission to edit e.g. Administrator.

It will be sent to users who were on the waiting list but can now join the Event due to increased capacity.

Please note: In this situation those who are still on the waiting list after the increase will receive the **events.user.now_waiting** notification outlining their new position.

Decrease Event capacity?

It is possible to decrease the Event capacity once users have already joined; however, this will not generate any notifications to users about changes, as the system will not revert users' positions. It will instead display this message:

e.g. this Event capacity was reduced from 2 users to 1, but the system did not move the other user to the waitlist automatically when the capacity was reduced.

📄 Make a copy 📊 Audit ✉ Send email invite ✎ Edit

Instead, when approval is required for an event, administrators/those with 'manage bookings and attendees' permission can manually rectify the situation by choosing which attendees should be reverted to their ability to join by using the '-' option.

Events > Event details > Attendee Registration

test event
3 users are joining this event, including 0 friends/family

Select a User, Group, Role or Extranet Browse Add Attendee Export to CSV

Warning! Event capacity exceeded by 2 places

User	Job title	Email	Approve / Decline	Notes	Date / Time		Attended
Jennifer Langdon	Trainer	jennifer@claromentis.net	<div style="border: 1px solid gray; background-color: #333; color: white; padding: 2px;"> --- ✓ Approved Declined </div>		25-09-2025 09:10	📄 🗑	<input type="checkbox"/>
Alan Metcalfe	Sales Assistant	alan@claromentis.net	Approved		25-09-2025 09:11	📄 🗑	<input type="checkbox"/>
Pippa Fraser	Human Resources Manager	pippa@claromentis.net	Approved		25-09-2025 09:11	📄 🗑	<input type="checkbox"/>

Once the number of users meets the new reduced capacity for the Event, the system will automatically add them to the waitlist as expected.

5. Other notifications

events.organiser.status_updated

This notification will fire when the status of an Event is changed (by a user who has 'edit this Event' permissions or an administrator) , and the recipient will be the user set as the 'Organiser'.

Status

- Draft
- ✓ Live
- Cancelled
- Archived

Events > test event > Edit Single Event

Edit Single Event

Title *

Category *

Tags popular tags: intranet, claromentis, microsoft, excel, team, social, word, powerpoint, corporate, BBQ

Organiser *

Please note: If you are making the changes and are also the organiser of the Event being changed, the notification will not be sent as you are aware you have done this and don't need to be notified

events.user.manager_added

This will fire if a user is added to an Event via the attendee registration area, which will only appear to those with the 'Manage booking and attendees' permission.

The recipient of the notification is the user who was added.

If approval was required, the user is automatically approved when added in this way, which results only in the 'Manager added' notification to the user (they will not also be notified that they were approved)

Events > Event details > Attendee Registration

test event

0 users are joining this event, including 0 friends/family

User	Job title	Email	Approve / Decline	Notes	Date / Time		Attended
Jennifer Langdon	Trainer	jennifer@claromentis.net	---		25-09-2025 09:10	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/>
Alan Metcalfe	Sales Assistant	alan@claromentis.net	---		25-09-2025 09:11	<input type="checkbox"/> <input type="checkbox"/>	<input type="checkbox"/>

Remember: A user has to have been defined in overall permissions for the Event to view/join etc before they can be picked in the registration area. If a user isn't appearing, check they have first been included in the permissions for the Event.

events.user.manager_removed

This will fire if a user is removed from the Event via the attendee registration area, which will only appear to those with the 'Manage booking and attendees' permission (or Administrators)

The recipient of the notification is the user who was removed.

The screenshot shows the Claromentis interface. At the top, a navigation bar includes the logo and menu items like Home, Company, Department, and Dashboards. A confirmation dialog is open, asking 'Are you sure you want to remove this booking?' with 'Cancel' and 'OK' buttons. Below the dialog, the page title is 'test event' and it shows '0 users are joining this event, including 0 friends/family'. There is a search bar with 'User: Amelia Jackson' and buttons for 'Browse', 'Add Attendee', and 'Export to CSV'. A table lists attendees:

User	Job title	Email	Approve / Decline	Notes	Date / Time	Attended
Jennifer Langdon	Trainer	jennifer@claromentis.net	---		25-09-2025 09:10	<input type="checkbox"/>
Alan Metcalfe	Sales Assistant	alan@claromentis.net	---		25-09-2025 09:11	<input type="checkbox"/>

If the same user that was removed tries to join the Event following this, the standard approval procedure will be followed if this has been implemented. e.g. they can request to join and be approved or declined.
