

Blog Notifications

We will provide an overview of available Blog notifications.

Notifications are attached to Blog permissions. Users will only receive notifications if they have permission to view the blog channel.

To find out more, check out our guide on [Creating Blog channels and permissions](#)

Templates for each language can be viewed and [edited](#) from Admin > System > Localisation > Edit templates > Blog

Notification not sending?

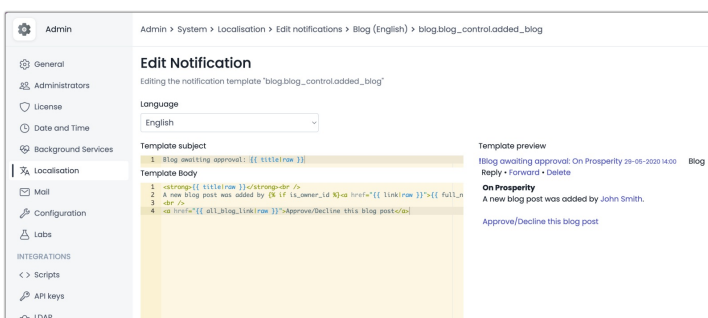

Remember: The type of notification received by users e.g. email, in-system, none etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are correct to receive this how they would expect.

What notifications can Blog send and who will receive these?

blog.blog_control.added_blog

This notification will fire when a new blog post has been [submitted for approval](#) (by a user who does not have 'Publish' rights) and the recipient will be the users with the 'Approve Others' permission.

blog.blog_control.blog

This notification will fire when a new blog post has been published to a channel and the recipient is [subscribed](#) to the channel.

If a user is not subscribed, they will not receive this notification when new posts are added even if they can 'View' the channel.

The screenshot shows the 'Edit Notification' interface for the notification template 'blog.blog_control.blog'. The language is set to 'English'. The 'Template subject' is 'New Blog Post: {{{ titleraw }}}'. The 'Template body' contains four lines of code: 1. {{{ titleraw }}} 2. [If {{ user_id }} is a moderator]>{{{ full_nameraw }} [else] Anonymous 3.
 4. View the blog post. The 'Template preview' shows a notification from 'Prosperity' with the subject 'New Blog Post: On Prosperity 29-05-2020 14:00 Reply • Blog' and the body 'John Smith just published a new blog post to Economics.' with a 'View the blog post' link.

blog.blog_control.edited_blog

This notification will fire when a blog post has been edited and the recipient is [subscribed](#) to the channel the post is in.

If a user is not subscribed, they will not receive this notification when new posts are edited even if they can 'View' the channel.

The screenshot shows the 'Edit Notification' interface for the notification template 'blog.blog_control.edited_blog'. The language is set to 'English'. The 'Template subject' is 'Blog Updated: {{{ titleraw }}}'. The 'Template body' contains four lines of code: 1. {{{ titleraw }}} 2. This blog post was recently updated by [If {{ user_id }} is a moderator]>{{{ full_nameraw }} 3.
 4. Approve/Decline this blog post. The 'Template preview' shows a notification from 'Prosperity' with the subject 'Blog Updated: On Prosperity 29-05-2020 14:00 Reply • Blog' and the body 'This blog post was recently updated by John Smith.' with an 'Approve/Decline this blog post' link.

blog.blog_control.your_blog

This notification will fire when a blog post submitted for approval has been published, the recipient is the user that submitted the post for approval (as they are not able to publish themselves)

The screenshot shows the 'Edit Notification' interface for the notification template 'blog.blog_control.your_blog'. The language is set to 'English'. The 'Template subject' is '[If {{ user_approve }} is approved] Blog Published [else] Blog Rejected [end if]: {{{ titleraw }}}'. The 'Template body' contains four lines of code: 1. {{{ titleraw }}} 2. A moderator [If {{ user_approve }} is approved] published [else] rejected [end if] your blog post 3.
 4. View your blog post. The 'Template preview' shows a notification from 'Prosperity' with the subject 'Blog Published: On Prosperity 29-05-2020 14:00 Reply • Blog' and the body 'A moderator published your blog post.' with a 'View your blog post' link.
