

We will provide an overview of available Blog notifications.

Notifications are attached to Blog permissions. Users will only receive notifications if they have permission to view the blog channel.

To find out more, check out our guide on [Creating Blog channels and permissions](#)

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > Blog**

Notification not sending?

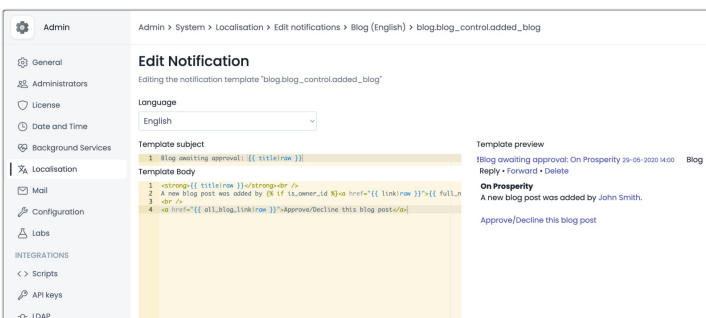

Remember: The type of notification received by users e.g. email, in-system, none etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are correct to receive this how they would expect.

What notifications can Blog send and who will receive these?

blog.blog_control.added_blog

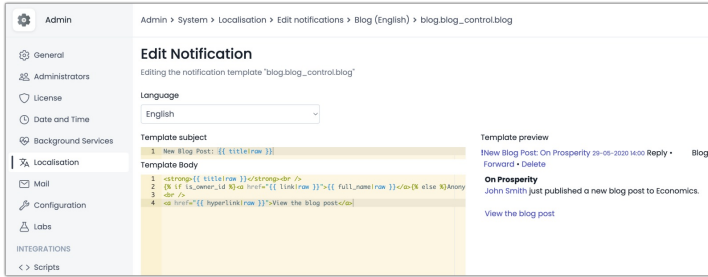

This notification will fire when a new blog post has been [submitted for approval](#) (by a user who does not have 'Publish' rights) and the recipient will be the users with the 'Approve Others' permission.

blog.blog_control.blog

This notification will fire when a new blog post has been published to a channel and the recipient is [subscribed](#) to the channel.

If a user is not subscribed, they will not receive this notification when new posts are added even if they can 'View' the channel.

The screenshot shows the 'Admin' interface for editing the notification template 'blog.blog_control.blog'. The left sidebar contains navigation options: General, Administrators, License, Date and Time, Background Services, Localisation, Mail, Configuration, Labs, and INTEGRATIONS. The main content area is titled 'Edit Notification' and shows the following settings:

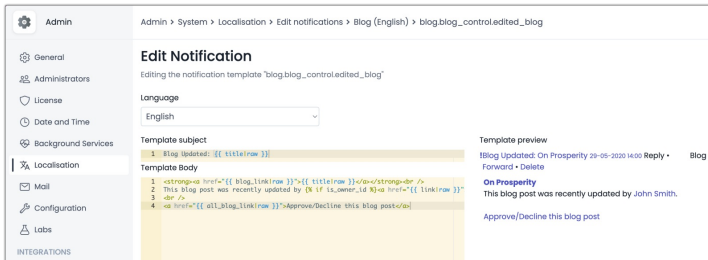

- Language:** English
- Template subject:** 1 New Blog Post: On Prosperity
- Template Body:**

```
1 <strong>[[ title row ]]</strong>
2 [[ if is_member_id %d <?php echo $link_row ]]</?php else %d Anonymous
3 <br />
4 <a href="[[ all_blog_link_row ]]">View the blog post</a>
```
- Template preview:** New Blog Post: On Prosperity 29-05-2020 14:00 Reply • Blog Forward • Delete
- On Prosperity:** John Smith just published a new blog post to Economics. View the blog post

blog.blog_control.edited_blog

This notification will fire when a blog post has been edited and the recipient is [subscribed](#) to the channel the post is in.

If a user is not subscribed, they will not receive this notification when new posts are edited even if they can 'View' the channel.

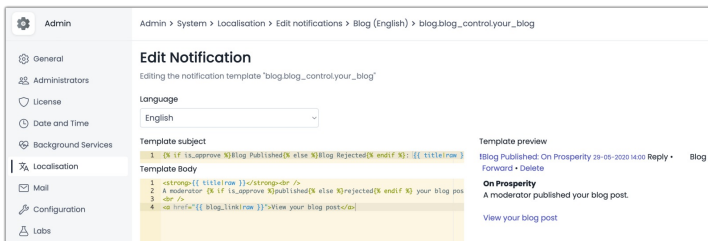

The screenshot shows the 'Admin' interface for editing the notification template 'blog.blog_control.edited_blog'. The left sidebar contains navigation options: General, Administrators, License, Date and Time, Background Services, Localisation, Mail, Configuration, Labs, and INTEGRATIONS. The main content area is titled 'Edit Notification' and shows the following settings:

- Language:** English
- Template subject:** 1 Blog Updated: On Prosperity
- Template Body:**

```
1 <strong>[[ if blog_link_row ]]>[[ title row ]]</strong><br />
