

Blog: Notifications

We will provide an overview of available Blog notifications.

Templates for each language can be viewed and [edited](#) from **Admin > System > Localisation > Edit templates > Blog**

A screenshot of the Claromentis admin interface. The top navigation bar includes the Claromentis logo, a search bar with the text "Ask anything", a clock showing "13:09", and several utility icons. Below the navigation bar, there are three columns of language options. The first column lists: French, Spanish, Polish, Kurdish. The second column lists: German, Dutch, Greek, Hungarian. The third column lists: Portuguese (Brazil), Czech, Arabic, Uzbek. Below these columns, there are three sections: "Blog", "Calendar", and "Discuss". Each section has a red box highlighting the language options: English, French, Spanish, Polish, Kurdish for the first column; U.S. International, German, Dutch, Greek, Hungarian for the second column; and Russian, Portuguese (Brazil), Czech, Arabic, Uzbek for the third column.

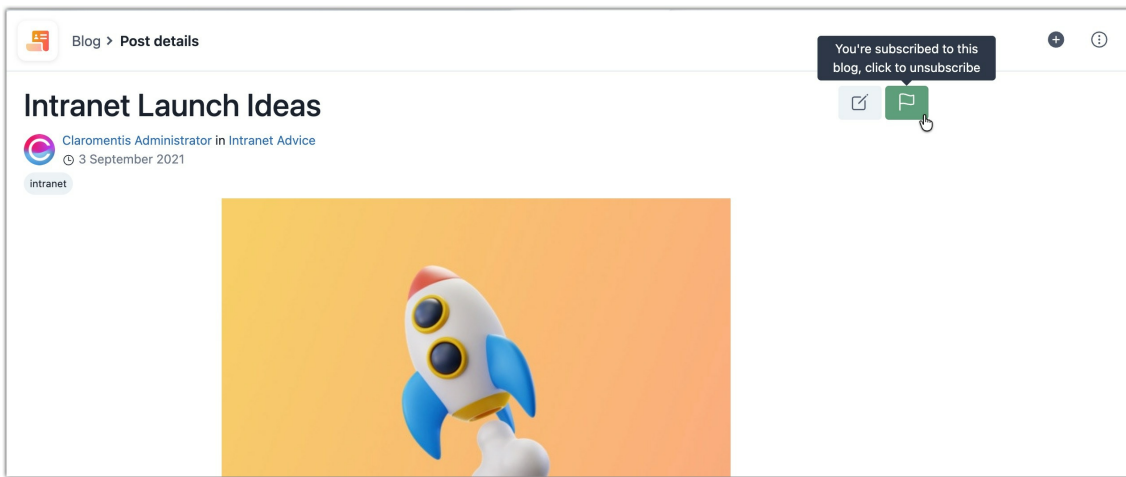

Notification not sending?

Remember: The type of notification received by users, e.g. email, in-system, none, etc will depend on their preferences as outlined [here](#).

If a notification is not evident, check that the recipient's preferences are correct to receive this as they would expect.

blog.blog_control.added_blog

This notification will fire when a new blog post has been [submitted for approval](#) (by a user who does not have 'Publish' rights), and the recipient will be the users with the 'Approve Others' permission.

blog.blog_control.blog

This notification will fire when a new blog post has been published to a channel and the recipient is [subscribed](#) to the channel. If a user is not subscribed, they will not receive this notification when new posts are added even if they can 'View' the channel.

blog.blog_control.edited_blog

This notification will fire when a blog post has been edited, and the recipient is [subscribed](#) to the channel the post is in. If a user is not subscribed, they will not receive this notification when new posts are edited even if they can 'View' the channel.

blog.blog_control.your_blog

This notification will fire when a blog post submitted for approval has been published; the recipient is the user who submitted the post for approval (as they are not able to publish themselves)
