Configuring Social Connect: Sign-in With Microsoft

Overview

This is an administrative guide on how to configure Sign-in with Microsoft in the Social Connect Module.

Once this has been configured, users can connect their account with their Microsoft Account allowing them to log in to the system simply by clicking the "Sign-in with Microsoft" button from the Login screen.

Sign-in

Sign-in With Microsoft

Powered by Claromentis Digital Workplace

1. Register an app on Microsoft Azure Portal

Log in to Azure Portal as a user that has admin privileges from your organisation to register a new app

https://portal.azure.com/

Under Azure services click "App registrations"

Click on **New Registration**

Application Name: **Claromentis Social Connect for {Your intranet name}**

Supported account type:

For wider compatibility select "**Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant) and personal Microsoft accounts (e.g. Skype, Xbox)**"

Alternatively, apply the appropriate account type to suit your organisation.

Redirect URI

Select a platform: **Web**

https://{your-intranet-url}/socialconnect/live/callback

Replace {your-intranet-url} with the actual URL of your intranet

2. Creating a client secret

Navigate to "Certificates & secret" tab on the left and click on **New Client secret** to create a new secret
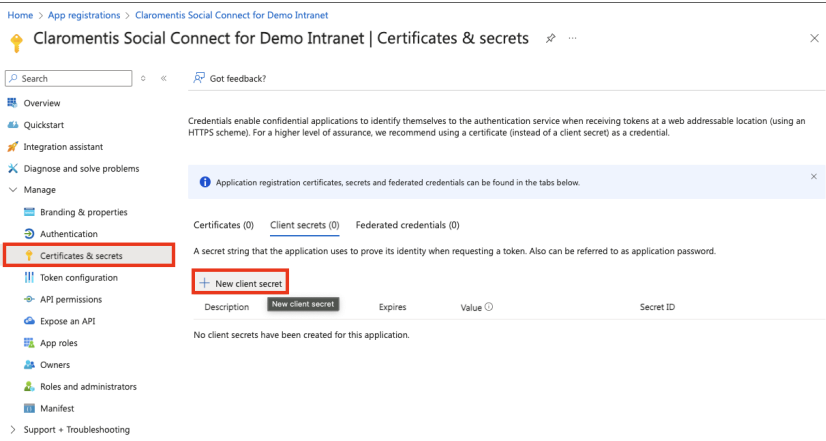

Enter the description and set how long the secret will expire.

Please note that you need to create a new secret when it's expired to ensure Sign-in with Microsoft continues to work.

3. Copy Client ID and Client Secret to Claromentis

Client ID: Get it from **Application (Client ID)**

Client Secret: Under Certificate and Secrets get the client's secret value

Don't forget to click **Save Configuration** button at the bottom.

Troubleshoot

1. Unauthorized Client error message

We're unable to complete your request

unauthorized_client: The client does not exist or is not enabled for consumers. If you are the application developer, configure a new application through the App Registrations in the Azure Portal at https://go.microsoft.com/fwlink/?linkid=2083908.

- Make sure you have configured the Social Connect correctly on Azure Portal and have **Microsoft Graph (User.Read) API permission** enabled.
- Make sure you have selected the appropriate **Supported account type**
-

2. Client error: 400 Bad request

[Guzzle][TransferException]Client error: `POST https://login.live.com/oauth20_token.srf` resulted in a `400 Bad Request` response: {"error":"invalid_client","error_description":"The provided value for the 'client_secret' parameter is not valid.","corr (truncated...)

Username

Password

This is likely caused by an invalid **Client ID** and or **Client Secret** or expired **Client Secret** in the Azure Portal.
